Integrated Tourniquet System® (I.T.S.®)

With the advent of body armor, the most common cause of preventable deaths in the tactical environment can be attributed to rapid blood loss due to extremity wounds. A major arterial wound can cause the victim to become unconscious within two minutes, bleed out and expire moments later.

Thanks to the BLACKHAWK! Integrated Tourniquet System (I.T.S.), we have the solution. This revolutionary technology integrates tourniquets into the legs and arms of each BLACKHAWK! HPFU™ garment (see page 4 – 5). The tourniquets are strategically positioned and oriented to the upper and lower extremities for immediate access under existing gear and can be operated by the wearer, a buddy or a medic.

I.T.S.® benefits:

- Tourniquets are always present
- Combined weight is less than one traditional tourniquet
- Single-handed operation
- Flip/pull/twist activation
- Activation complete in seconds
- Safe and secure lockdown
- Complete occlusion of blood
- Ability to train to build muscle memory
- Useful in training scenarios

Did you know? 60% of preventable combat deaths are from extremity bleeding, and 50 – 70% of all combat injuries are extremity wounds.

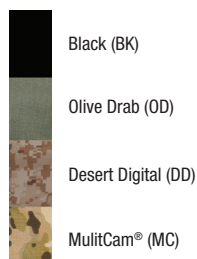

High Performance Fighting Uniform (HPFU™)

The HPFU is a modern approach to the combat uniform, featuring a lean, athletic cut with no-melt, no-drip cotton/nylon ripstop construction. The original HPFU incorporates four life-saving tourniquets into the arms and legs of each garment while the HPFU V.2 features two tourniquets in each garment. The low-profile HPFU Slick omits the tourniquets altogether.

Materials:

- Black, Olive Drab & Desert Digital: 70% cotton/30% nylon ripstop
- MultiCam®: 50% nylon/50% cotton ripstop

HPFU™ Pants

- Four tourniquets built into upper and lower legs (HPFU™ Pants, 87HP07)
- Two tourniquets built into upper legs (HPFU™ V.2 Pants, 87HP27)
- No tourniquets included (HPFU™ Slick, 87HP17)
- Padded, adjustable waistband for increased comfort and mobility when wearing fully loaded tactical belt
- Vertically mounted zippered pocket on top of cargo pocket for easy access while seated
- Reinforced belt loops accommodate BLACKHAWK!® CQB/Rigger's Belt (sold separately, see page 81) or other belts up to 1.75" wide
- Gusseted crotch and reinforced seat
- Blousing ties on leg cuffs
- Integrated knee pad pockets with cinch straps on back of knees to stabilize pads (pads sold separately, see page 225)
- Externally mounted guide loops stabilize BLACKHAWK!® or other knee pads for outside-the-pants wear (1" or 2" width)

Thermostatic Base-Layer™ Garments

Engineered Fit™ Series

Designed for maximum comfort and freedom of movement, our Thermostatic Base-Layer™ Garments regulate body temperature, wick moisture, dry quickly and control odor. The Engineered Fit™ Series allows you to choose between a body-contoured Standard Fit and full Compression Fit simply by size selection. Select one size down from your normal size to achieve a Compression Fit—a true next-to-skin, no-movement fit—which eliminates potential friction-related “hot spots” and helps reduce muscle fatigue. Each garment comes equipped with the following standard features:

- Body: Jersey knit 92% nylon/8% spandex
- Panels: 82% polyester/18% spandex
- Modern athletic fit
- Antimicrobial treatment inhibits growth of bacteria and prevents odor
- Smooth matte-finish face surface reduces drag and bulk when layering
- Soft jacquard elastic waistband
- Fast drying

Mesh Panel Construction:
Strategically placed mesh panels enhance freedom of movement and heat dissipation.

Flat-Seam Technology:
Innovative flat-seam stitching technique minimizes irritation in the seam areas

Moisture Wicking:
Brushed interior fabric breaks up fibers to enhance moisture-wicking performance via capillary action. Additional moisture-wicking treatment helps repel moisture.

Engineered Fit™
Unique material technology allows you to choose between a body-contoured Standard Fit and full Compression Fit simply by size selection.

Size Selection:

To find your size, look up your measurements in the chart below. As demonstrated in the chart, if your chest measures from 42” – 44” and you prefer a body-contoured Standard Fit, choose size Large. If you prefer a full Compression Fit, simply size down to a size Medium.

FITTING CHART (In inches, using chest size for tops and waist size for bottoms)

Technology

Our mission at BLACKHAWK!® is to design the most reliable carriers, soft armor, plates and accessories to help improve operator efficiency, confidence and mission completion. Whether worn alone or dovetailed with any of our other tactical gear, each piece in our armor line provides all-around protection and versatility to suit every warrior's needs. Choose between two manufacturing options: Berry Amendment Compliant (BAC) or Commercial off the Shelf (COTS).

Diversi^on™ Line

Our new Diversi^on bags and packs go beyond "discreet" or "concealed" by mimicking everyday gym bags, sports equipment bags or backpacks. Transport and store firearms conveniently without drawing attention thanks to hidden, easy-access compartments and common color schemes that help you blend in with the world around you.

Available Colors:

Gray/Black (GYBK), Black/Red (BKRD), Gray/Blue (GYBL), Gray/Red (GYRD), Ranger Green/Coyote Tan (RGCT)

Diversi^on™ Racquet Bag **NEW!**

Take concealment to a whole new level with the Diversi^on Racquet Bag. Featuring padded walls with an inner shell, this clever bag mimics an ordinary tennis racket case but allows you to keep firearms protected and out of sight.

- Constructed of 420 velocity nylon
- Internal divider for carrying up to two firearms or separated upper/lower AR-15 receivers (up to 29" long)
- Padded walls with inner shell hide firearm outlines
- Heavy-duty lockable zipper sliders

65DC63 | GYRD, GYBK, GYBL | \$64.99

Diversi^on™ Board Pack **NEW!**

This simple single-pocket pack gives new meaning to the phrase "hidden in plain sight." Featuring a muzzle retainer, retention strap and padded divider, the Diversi^on Carry Board Pack is built to carry firearms securely and discreetly.

- Constructed of 420 denier velocity nylon (BKRD, GYBK, GYBL) or 500 denier nylon (RGCT)
- Discreetly transport long guns with folding stocks, short barrels or AR platform divided into upper/lower halves (up to 29" long)

Hydration

Microban® antimicrobial protection is built directly into each BLACKHAWK!™ hydration reservoir, so you don't have to worry about it washing off or wearing away after extensive use. When microbes such as bacteria, mold or mildew come in contact with the product's surface, the Microban technology penetrates the microbes' cell walls, disrupting key cell functions so they can no longer function, grow or reproduce.* And the result? Your drinking water stays clean and bacteria-free!

*This information is based on standard laboratory tests and is provided for comparative purposes to substantiate antimicrobial activity of non-public health applications. Antimicrobial action is limited to product surface.

Molded Duty Gear

BLACKHAWK!® has done it again, giving you the best of both worlds—traditional-looking yet street-tough duty gear. Our molded duty gear combines the lightweight, high-performance, disinfecting properties of nylon with a classic molded look. Both the Basketweave and Plain Finish Molded Duty Gear feature a traditional leather appearance while the Molded CORDURA® Duty Gear gives you all the benefits of tough, abrasion-resistant CORDURA® nylon. No matter which you choose, you'll get the strength of a proprietary five-layer laminate system with an integral polymer core for long-lasting service life.

Dynamic Entry®

With increasingly tighter budgets and the ever-present threat of active shooter call-outs, we have remained focused on providing the most effective and cost-efficient manual entry equipment available. But we know that cost is not the only factor affecting agencies. Tightening space requirements necessitate smaller tools that can still get the job done.

The Dynamic Entry Mini Deployment Kit gives operators a bolt cutter, sledge and pry bar—all secured in a compact carry bag that weighs only 16 pounds and can easily be stored in the trunk of a patrol or rescue vehicle. Another compact, budget-conscious tool choice is the newly redesigned Breaching Sledge. Weighing only eight pounds and measuring 22 inches in length, the Breaching Sledge features micro-metals for reduced spalling, a sure-grip handle system to help eliminate slippage and counter-angled friction ridges on the wedge for added grip and stability during breaching.

With Dynamic Entry, Nothing Shall Stand in your Way®.

Collapsible Tool Series

Combining years of research and development with input from operators in the field, the groundbreaking Dynamic Entry® Collapsible Tool Series exceeds our legendary durability standards. At the heart of this revolutionary design are the following standard features:

- Compact collapsible design for close-quarter operations and easy transport
- Extended shafts for more strike power, pry leverage and breaching force
- Epoxied fiberglass core surrounded by two interlocking stainless steel shafts
- Dual-locking mechanism secures shafts when extended
- Handgrip provides secure grip in extreme weather conditions and protects locking mechanism from dirt or debris

Dynamic Entry® Collapsible Breacher

The Collapsible Breacher features a tempered stainless steel wedge with counter-angled friction ridges that are specifically designed to grip breaching surfaces securely. These ridges increase stability and reduce tool slippage during breaching operations.

- Includes all Dynamic Entry® Collapsible Tool Series™ standard features (see top of page)
- Length: 16.75" (collapsed), 24.5" (extended)
- Weight: 7.4 lbs.

DE-CB | Black | \$399.99

Dynamic Entry® Collapsible Mini ThunderSledge™

Featuring a 6-lb. drop-forged head, the Collapsible Mini ThunderSledge is custom-designed to deliver exceptional striking force when extended.

- Includes all Dynamic Entry® Collapsible Tool Series™ standard features (see top of page)
- Length: 14.5" (collapsed), 22" (extended)
- Weight: 10.2 lbs.

DE-CMTS | Black | \$349.99

Dynamic Entry® Collapsible Stainless Hallagan Tool

The Collapsible Stainless Hallagan Tool has the added benefit of a horn for stubborn prying chores and also features counter-angled friction ridges for tool stability and slippage prevention.

- Includes all Dynamic Entry® Collapsible Tool Series™ standard features (see top of page)
- Length: 16.75" (collapsed), 24.5" (extended)
- Weight: 7.7 lbs.

Dynamic Entry® Breaching Sledge

Our newly redesigned Breaching Sledge features a more compact breaching head for improved maneuverability and counter-angled friction ridges for added stability during breaching. The Breaching Sledge brings together the best of both worlds, combining the strike face of a sledge hammer with the prying wedge of a Hallagan Tool, all in a smaller and more balanced package.

- Micro-metal composition for added strength and reduced spalling when struck by another Breaching Sledge
- Electrically nonconductive fiberglass handle is resistant to 100,000 volts AC
- Sure-grip handle system reduces the chance of slippage during operations
- Friction ridges on the wedge for added grip and stability during breaching
- Available in Black and high-visibility Yellow
- Length: 22"
- Weight: 8 lbs.

Note: The non-sparking alloy used in our Dynamic Entry® Non-Sparking, Electrically Nonconductive Hallagan Tools is not intended for use on steel doors or frames. When breaching steel doors, we recommend using one of our stainless steel tools such as the Stainless Hallagan Tool (see below).

Dynamic Entry® Stainless Hallagan Tool Series

The hallagan tool has been a standard entry tool for law enforcement and fire/EMS professionals for nearly 75 years. Using recommendations from operators in the field, we’ve taken this classic design and modernized it for the 21st century.

- Electrically nonconductive handle system is resistant to 100,000 volts AC
- Safety-guard handgrip reduces the possibility of operator’s hands slipping onto working end of tool
- Tempered stainless steel wedge with counter-angled friction ridges for tool stability and slippage prevention

Knoxx® Shotgun Breacher's Stock and Accessory Kit

A collaborative effort between our Dynamic Entry® and Knoxx design teams, this kit features a Knoxx BreachersGrip™ (see page 243), weapon's catch, sling and body armor adapter. The catch, sling and adapter work together to provide an effective and secure retention system. The weapon's catch attaches to either a vest with S.T.R.I.K.E.® webbing using our proven Speed Clips™ or to a standard issue duty belt using ALICE clip retention straps. The sling attaches to the butt of the stock while the adapter loops around the shoulder section of the breacher's body armor.

Technology

Whether you're on duty, gearing up for combat or heading out on the shooting range, our footwear gives you the comfort, stability, pronation control and support to help you go that extra mile. We use the highest quality materials to ensure long-lasting performance in virtually any climate or condition.

OrthoLite® Footbed

All of our boots are equipped with a washable, antimicrobial, custom-molded OrthoLite® footbed, giving you quick-drying, breathable cushion. This insole technology is highly abrasion resistant and won't break down or lose effectiveness over time.

Vibram® Outsoles

The Vibram brand is widely recognized as a leader in high-performance soling products. In an effort to maintain our meticulous quality standards, we incorporate Vibram outsoles in many of our boots to help you survive practically any terrain.

Dri-Lex® Lining

Dri-Lex is a multi-layer lining system that expertly transports moisture away from the foot to help keep you dry and cool. Our Desert Ops™ and Black Ops™ Boots incorporate this technology for added comfort during tactical operations.

Injection-Molded Lace Lock

Several of our tactical boots incorporate an injection-molded lace lock—a quick no-tie lacing system that's designed to keep your laces locked down. The lace ends stow away neatly in a pocket on the tongue so you don't have to worry about the laces catching on objects or becoming a tangled mess.

SERPA®

Technology

When it comes to speed and reliability, our patented SERPA® technology guarantees unparalleled performance. The placement of the SERPA Auto Lock™ release reinforces a full master grip by allowing you to draw the weapon normally with the index finger sliding from holster body to weapon frame in one single movement. This proven retention design immediately engages the trigger guard with an audible click as the pistol is holstered, and it won't let go until you release it. [Patented 5,918,784 and/or other patents pending]

Retention Levels

Level 2 SERPA® holsters incorporate two levels of retention: a passive retention detent adjustment screw and patented SERPA Auto Lock™ release. The adjustment screw lets you adjust the force needed to pull the handgun out of the holster after the SERPA Auto Lock is released. Level 3 SERPA holsters incorporate three levels of retention: the same passive retention detent adjustment screw and SERPA Auto Lock release with an added thumb-activated Pivot Guard.

Concealment Duty Duty Light Bearing

With your index finger straight, lay the pad of your finger on top of the SERPA® Auto Lock™ release. Apply gentle pressure against the release with extended index finger flat and straight as you draw.

Materials & Workmanship

We use an injection-molding process to custom mold our SERPA® holsters to the specific weapon model. Constructed of a lightweight, resilient polymer carbon-fiber blend, these durable, impact-resistant holsters retain their rigid shape for rock-solid performance. All SERPA holsters are proudly made in the USA at our Manhattan, Montana facility.

Common Draw Technique

The SERPA® draw technique is common to all holsters in the SERPA family, allowing officers to transition from a simple Level 2 holster to a more elaborate Level 3 holster—using the same draw every time. By reinforcing these learned skills, training time is significantly reduced, and officer safety in high-stress situations is increased.

Carry Positions

We understand that versatility is important to our customers. With a wide range of carry options—on the hip, leg, chest or shoulder—SERPA® holsters are at the ready whenever and wherever needed.

Epoch™

Technology

Building on our track record of reliable holster performance, the new Epoch (pronounced “EP-uhk”) Holster delivers three levels of weapon retention for our highest level of security. The patent-pending retention system engages the pistol’s ejection port when holstered and won’t let go until you release it. As an added safety measure, the Pivot Guard opens by thumb activation and is designed so it won’t close accidentally, locking you out of the holster. This unique design accommodates the most popular under-barrel lights on the market today, giving you all the versatility you’ve come to expect from BLACKHAWK!®.

Function

Reinforcing learned skills by focusing on proper grip is a signature of BLACKHAWK!® holster design. The placement of the Epoch Auto Lock release and outboard index finger indent reinforce a full master grip by allowing the shooter to draw the firearm with the index finger and thumb in proper alignment.

Leather Holsters

Italian Leather

Leather manufacturers in Italy are well-known for producing extremely high-end products. That's why we use premium Italian cowhide leather—the finest material we could get our hands on.

Vegetable Tanned

We use a plant-based “tannin” compound for the tanning process, giving each holster a natural finish.

Drum Dyed

The leather is placed in a huge barrel-shaped drum and tumbled with the dye for 24 to 48 hours. This forces the dye into the leather for long-lasting results.

GripBreak™ Leather Holster **NEW!**

The GripBreak Leather Holster's patented locking mechanism offers secure weapon retention in a premium Italian leather design. Maintain a master grip and quick, smooth draw thanks to a simple thumb release lever.

- Constructed of premium drum-dyed Italian leather
- Inner molded shell
- Patented automatic locking system holds firearm in place
- Fits belts up to 1.75" wide
- Molded release guard
- See Holster Fit Chart on page 150 – 161 for available holster models

4219 | BK | \$76.99

Suede Leather Tuckable Holster **NEW FITS!**

Completely conceal your pistol without having to wear a cover garment or an untucked shirt. The inconspicuous belt clip slides onto your pants while your weapon stays tucked under your shirt.

- Smooth interior for easy draw
- Rough-side outer material for non-slip fit
- Fits belts up to 1.75" wide
- New design offers more holster “footprint” to better stabilize firearm
- Repositioned belt clip for less bulk and better concealment
- See Holster Fit Chart on page 150 – 161 for available holster models

4216 | BN | \$38.99

Suede Leather Angle Adjustable ISP Holster **NEW!**

Made using top-quality suede leather, this inside-the-pants holster is equipped with an angle-adjustable belt clip so you can position your firearm for better concealment and comfort.

- Smooth interior for easy draw
- Rough-side outer material for non-slip fit
- Fits belts up to 1.75" wide
- Injection-molded angle-adjustable belt clip for cant adjustment
- See Holster Fit Chart on page 150 – 161 for available holster models

42180 | BN | \$34.99

Contour Stitched

We build our holsters by closely stitching along the outline of the pistol. Not only does this result in a better fit and appearance, but it's one of the telling marks of a well-made leather holster.

Hand Boned

Leather holsters were traditionally shaped to a particular pistol with a small animal bone. Modern metal or plastic tools have replaced bones, but the term is still used. We use this technique to give our holsters a sculpted outline.

Hand Polished

As a final touch, we use a finishing cream to seal in the dye and create a nice lustrous shine.

Leather Tuckable Pancake Holster NEW!

Constructed of premium leather and molded Kydex®, this holster combines the benefits of three holsters in one, giving you the option of inside-the-pants, tuckable or belt-mounted wear. No matter how you choose to wear it, each design will contour to your body for exceptional comfort and concealment.

- Three-slot design for behind-the-hip, strong-side, cross-draw or appendix carry (for belt carry)
- Injection-molded removable/angle-adjustable belt clips for cant and ride height adjustment (for inside-the-pants carry)
- Belt clips designed for traditional inside-the-pants wear or use as tuckable holster under shirt
- Fits belts up to 1.5" wide
- Adjustable tension screw for customized retention

Nylon Holsters

Here at BLACKHAWK!®, we believe that quality is paramount. That's why we construct each of our nylon holsters with an ultra-thin, three-layer nylon laminate base material. Many are then covered with hardwearing CORDURA®—the gold standard of nylon material—for outstanding abrasion and fade resistance. Others feature a velvet-like laminate suede outer material, giving the holsters a soft, suede-like appearance and texture.

Craftsmanship

We've come to the conclusion that tactical knife users make the best tactical knife designers. That's why our blades are designed with input from expert knife tacticians in order to give you unparalleled quality, utility and performance. So when you're looking for big value at a price that fits your budget, choose from our expansive selection of high-quality cutting tools.

Fixed Blade Knives

Gideon™ Drop Point

The multipurpose Gideon Drop Point lets you employ the entire edge of the blade for a variety of cutting chores. Its robust, curved fixed blade is constructed of AUS8A stainless steel with a black Ti-Nitride finish. An additional finger groove in front of the quillon provides additional grip and control.

Tatang™

Designed by edged-weapons expert Michael Janich, the Tatang employs the savage cutting power of a traditional Filipino barong in a leaner, more versatile package. When gripped at the rear of the pistol-grip-style handle, the weight-forward blade gives it tremendous reach and chopping power. Choking up on the subhilt shifts the balance back for more controlled cutting, trapping and backcutting.

- Blade length: 8.600"/218 mm
- Overall length: 13.500"/343 mm
- Blade material: 1085C high-carbon tool steel
- Blade finish: Black epoxy finish

Ergonomic Grip

This ergonomically designed pistol grip with finger grooves is comfortable, prevents fatigue and aids in controlling the weapon even when you wear gloves. The aggressive textured grip surface minimizes slippage and is virtually impervious to oils and solvents used on firearms.

- Fits most AR-15/M16 style rifles
- Subtle finger grooves
- Integral rear upper extension supports web of hand
- Rubber bottom plug with lanyard and storage compartment

71EG00 | BK, OD, DK | \$26.99 

Low Profile Rail Cover Wire Loom

Safely keep electrical wires out of the way with this lightweight, low-profile five-slot cover. It uses an integral wire loom to quickly and reliably secure electrical wires commonly found on remote pressure switches.

- Fits most Picatinny spec rails
- Constructed of Santoprene® for rubbery grip surface
- Low-profile ladder-style cover for rail protection

71RC01 | BK, OD, DK | \$7.99 

Rail Mount Vertical Grip

Enjoy improved weapon control and heat management with our Rail Mount Vertical Grip. Molded of high-performance, fiberglass-reinforced polymer, it incorporates redundant clamp screws for secure, reliable mounting and an adjustable fit to compensate for out-of-spec rails.

- Constructed of fiberglass-reinforced polymer
- Two different caps (included) for custom length
- O-ring sealed compartment for tools, batteries, etc.

71VG00 | BK, OD, DK | \$38.99 

Low Profile Rail Cover

Get complete rail protection with minimal weight with the Low Profile Rail Cover. Constructed of lightweight Santoprene® with a rubbery grip surface, this rail cover delivers improved weapon control and effectively shields the operator from sharp rail edges.

- Fits most Picatinny spec rails
- 18 slots of length can be cut to size for a custom fit
- Low-profile ladder-style cover for rail protection
- Clip onto rails without removing other attachments

71RL00 | BK, OD, DK | \$10.99

3700, 3800 and 3900 Series

We understand that no two missions are the same and that your modular gear preferences may change on a daily basis. That's why we offer a wide selection of quality nylon pouches to accommodate your varied yet specific needs. Choose from our MOLLE 3700 Series, Speed Clip™ 3800 Series or USA-made MOLLE 3900 Series pouches.

Available Colors:

MOLLE 3700 Series

Mount our 3700 Series pouches to any S.T.R.I.K.E.® or PALS/MOLLE platform by weaving the integral straps on the back of the pouch in and out of the platform webbing. Our MOLLE 3700 Series pouches are constructed of 500 denier nylon (solid colors) or 500 denier CORDURA® nylon (MultiCam®).

Speed Clips™ 3800 Series

Our innovative Speed Clips are the quickest, strongest and most convenient modular attachment system on the market—allowing you to quickly mount, disconnect and rearrange your gear with ease. Our Speed Clip™ 3800 Series pouches are constructed of 1000 denier nylon (solid colors) or 1000 denier CORDURA® nylon (MultiCam®). See Speed Clips on page 214.

USA MOLLE 3900 Series

In support of the Berry Amendment Compliant requests from US Fighting Forces, we now offer a complete line of pouches made in our Meridian, Idaho facility. Our USA MOLLE 3900 Series pouches are constructed of 500 denier CORDURA® nylon.

Hybrid Design

Our hybrid pouches are designed for extreme versatility, allowing you to mount the pouch to S.T.R.I.K.E.® or PALS/MOLLE platforms via our Speed Clips™ or to a belt using either ALICE Clips or our sturdy BTS™ belt loop attachment system. See all hybrid pouches on page 212 – 214.

Gloves

BLACKHAWK!® gloves come in a variety of styles, colors and sizes, each with different levels of fire resistance, water repellency or cut resistance to give you the most reliable protection for any job. Constructed with the finest materials available, our gloves are designed with the heroes of the world in mind.

How to Measure

Wrap a tape measure around your knuckles or the widest part of your hand and make a loose fist. Round that measurement to the nearest inch and refer to measurement chart below for approximate glove size.

Measurement Chart:

- 7" (20.5 cm) = Small (SM)
- 8" (23 cm) = Medium (MD)
- 9" (25.5 cm) = Large (LG)
- 10" (28 cm) = X-Large (XL)
- 11" (30.5 cm) = XX-Large (XX)

Sportster™ TraverseTrack™ Bipod **NEW SIZE!**

Combining pivot and traverse functions with a time-tested bipod design, the Traverse Pivot Bipod is an industry first. The new horizontal traverse feature allows you to steadily track a moving target or change from target to target without repositioning the firearm. And when you're shooting on an uneven surface, the pivot action lets you swivel the firearm to either side, giving you a level shooting platform.

- Durable all-metal construction with robust tubular legs
- Horizontal traverse for smooth target acquisition and tracking
- Pivot action for level shooting on uneven terrain
- Rapid-adjust lever lock
- Spring-return telescoping legs
- Easily attaches to sling swivel stud

Knox® Technology

If you're a hunter, sport shooter or law enforcement officer, you're probably well-acquainted with the many bruises, welts and aches associated with shoulder-pounding recoil. But thanks to our Knox recoil-reducing technology, you'll never look at large-caliber rifles or shotguns the same way. This patented technology integrates a powerful extension spring system into the stock to significantly cut muzzle rise for faster target reacquisition and to help reduce felt recoil of even the most potent loads. It effectively eliminates shoulder fatigue, harsh recoil and related injuries, giving you confidence to make the shot.

Knox stocks with dual recoil-compensation systems incorporate two springs inside the stock while models with a single recoil-compensation system incorporate one spring into the design. Each stock is carefully crafted to give you just the right amount of recoil reduction, depending on its intended application.

Shotgun Stocks

Whether you're looking for an economical recoil solution for the job or planning to take down a trophy buck, we have plenty of options for our shotgun-toting customers. Each Knoxx® shotgun stock comes equipped with the following standard features:
