**LEVER**EVOLUTION™

## ALL OTHER LEVER LOADS ARE POINTLESS!

Turn your "brush gun" into a truly devastating long range performer!

LEVEREVOLUTION™ is the most exciting thing to ever happen to lever gun ammunition. Hornady, the leader in ballistic technology, brings you an innovation in ammunition performance featuring state of the industry elastomer Flex Tip™ Technology that is SAFE in your tubular magazine. Its higher ballistic coefficient delivers dramatically flatter trajectories for fantastic downrange energy increases

and amazing bullet expansion at all ranges. It truly is an Evolution in lever gun ammunition!

- Up to 250 feet per second faster muzzle velocity than conventional lever gun loads
- Exceptional accuracy and overwhelming downrange terminal performance
- Patent Pending Evolution™ bullet featuring elastomer Flex Tip™ Technology
- Up to 40% more energy than traditional flat point loads

**LEVER**EVOLUTION™

AVAILABLE IN: 30-30 WIN,  
35 REM, 444 MARLIN,  
45-70, 450 MARLIN

**Hornady**  
Accurate. Deadly. Dependable.

# LEVEREVOLUTION™

## FEATURES

### 1) ELASTOMER FLEX TIP™

This high-tech elastomer tip dramatically improves the ballistic coefficient, while still providing shock-absorbing safety in the magazine.

### 2) EVOLUTION™ BULLET

The Evolution bullet provides a higher ballistic coefficient and affords dramatic velocity increases over traditional flat point loads! It also delivers devastating terminal performance over a wide velocity range.

### 3) PROPELLANT

New propellants provide up to 250 fps more muzzle velocity at safe pressures, resulting in flatter trajectories and up to 40% more energy.

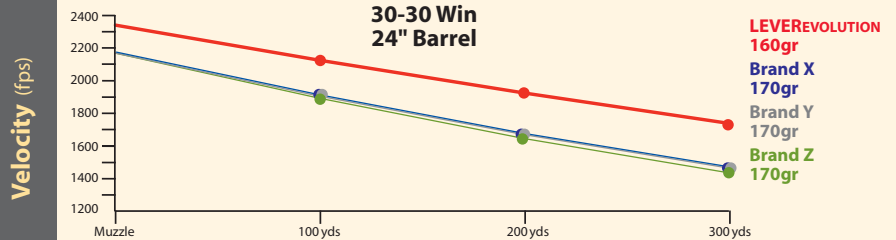

### 4) CASE AND PRIMER

Like all Hornady ammunition, our LEVEREVOLUTION rounds use the highest quality cases and primers available. Consistent components translate to consistent shooting in the field.

# REAL WORLD PERFORMANCE

There's nothing theoretical about the improved performance of the LEVEREVOLUTION cartridge. By every measure – trajectory, energy, expansion – LEVEREVOLUTION outshoots and out-hits other lever loads.

**Velocity:** The higher ballistic coefficient of the LEVEREVOLUTION delivers higher velocity downrange – 400 fps faster at 250 yds. than other lever gun loads.

**Energy:** LEVEREVOLUTION delivers 300 ft. lbs. more energy at the muzzle and 400 ft. lbs. more at 250 yds. when compared to the competition.

**Expansion:** With higher retained energy downrange, the LEVEREVOLUTION hits hard and expands rapidly for deep, wide wound channels. Wound cavities are nearly 50% larger from the muzzle out to 250 yds. than with flat point bullets.

30-30 Winchester 160 gr. Evolution™  
200 yd. Bare Gelatin Max Temporary
