

Hunting and shooting

[WW Supreme (to be launched)]

This new model is based on the successful Supreme Pro.

WW Supreme is equipped with Bluetooth technology for totally wireless communication with your mobilephone.

The mobile phone has become a natural part of our daily life. It is a tool for various forms of communication. We use our mobiles everywhere today: in the car, on the bus, in shops, on the street, etc.

- You answer and finish a call by pressing the PTT-button at the cup. You can also use voice-dialling. As all Supreme Pro models there is an AUX input for connecting external audio sources, such as a hunting radios or dog tracker.
- (More information soon)
