page 26

FRONT COVER: Todd Jarrett USPSA Limited Edition .40 • SX1640J
BACK COVER: Nite-Tac .45 • RX1445S

Todd has used Para pistols exclusively for the last 15 years, logging over a million rounds of ammunition through them as he has competed in practical shooting competition.

SHOOT WITH THE BEST...

Todd Jarrett has been a dominant force in practical shooting in the United States for the past decade. This soft spoken southern gentleman makes legends quiver in their holsters when he approaches the shooting line.

Then as he burns down the field course shooting “A”s faster than they can imagine with his tuned Para pistol they shake their heads and wonder what to do next.

Todd has won nine US National Titles, and over 60 area and state championships. He has been a member of the United States Practical Shooting Association (USPSA) “Gold Team” since 1990.

Todd wins his second “Steel Master,” title at the 2005 Steel Challenge.

He has competed internationally since 1992 and held the International Confederation’s (IPSC) World Champion title from 1996 to 1999.

He is the only USPSA Triple Crown winner, the only Grand Master to have won National Championships in all four USPSA handgun divisions, in addition to being a two-time Steel Master in World Speed Shooting competition.

A true champion, Todd loves to share his winning knowledge with others. He has designed two single-action Para pistols for practical shooting (see the centerfold) so you too can have the Para winning edge.

The Best Hammers

Para's skeletonized spur hammer has a faster lock time than conventional hammers. You get a clean, crisp release of the hammer each time you press our match-grade trigger, allowing you to break the shot precisely as you come on target.

SLIM HAWG
Product Code:
PSHX645S

WARTHOG
Product Code: WHX1045R

THE ULTRA-COMPACT PARA WARTHOG

The Para Warthog is the world's smallest .45 ACP, 10+1 round, semi-automatic pistol. It is an extraordinary handgun... only 6.5 inches in length and 4.5 inches high including the magazine.

The Warthog was made for action. The pistol's compact frame makes it easy to carry into any situation, yet the small size won't mean a sacrifice in stopping power. The contoured grip and beavertail grip safety give you control over the pistol, without having to risk hammer bite.

All Para pistols are shipped with two magazines. In the case of the Para Warthogs, there is a bonus on the second magazine – it comes with a grip extension. The floor plate on the second magazine adds length to the grip giving you more holding surface and better control, but does not alter the capacity of the magazine.

SLIM HAWG
PSHX645S

The Slim Hawg combines the incredibly small frame of the Warthog with the timeless reliability of the single stack, single-action 1911. This stainless pistol holds 6+1 rounds of .45 ACP firepower, weighs a mere 30 ounces when empty and has Griptor™ grasping grooves to help control recoil and make every shot as accurate as possible.

NITE HAWG
NHX1045N

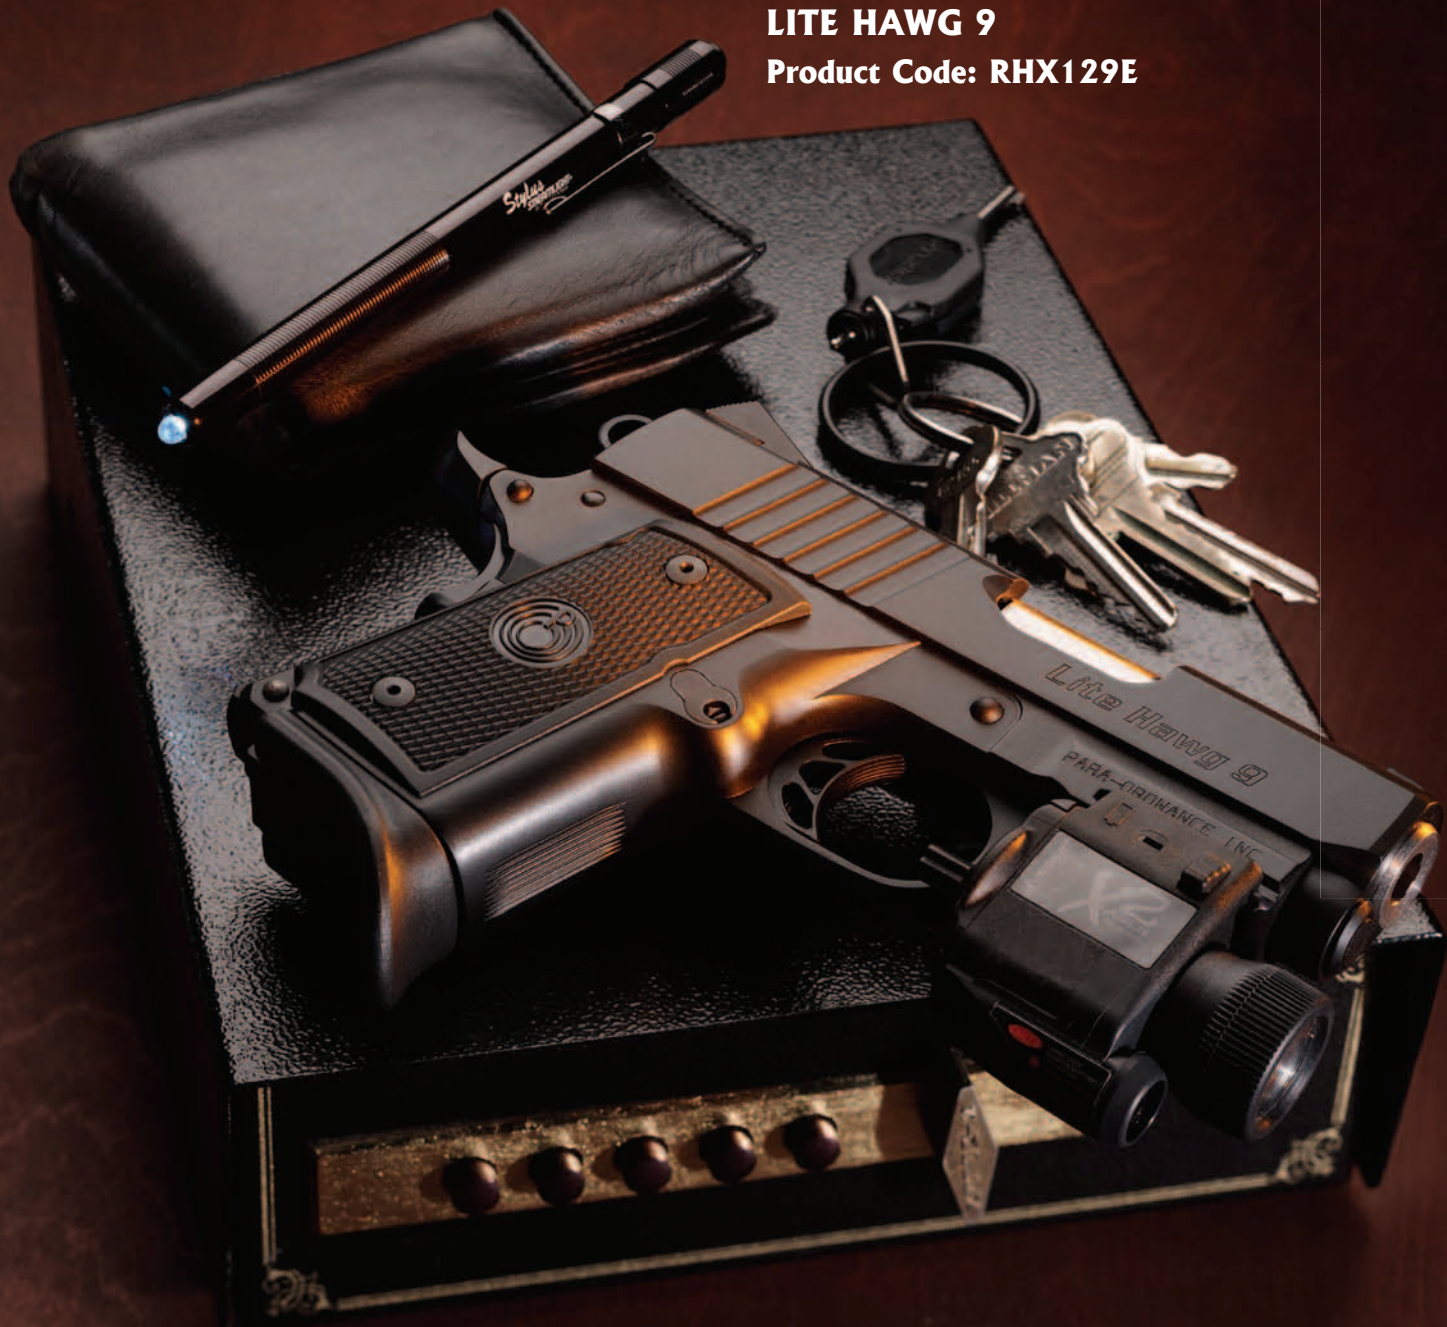

Para's special edition Nite Hawg has all the power of the super-compact Warthog, while boasting a non-reflective all-black finish and tritium night sights. Despite its small size, the Nite Hawg is also remarkably controllable, thanks to its superbly engineered and contoured grip design.

WARTHOG
WHX1045R

The original super-compact .45 with truly awesome firepower is the Para Warthog. There is no 1911-style, ten-round, semi-auto in the world smaller than the Warthog. The classic Warthog comes in Para's highly-durable Regal finish.

LITE HAWG 9
Product Code: RHX129E

LITE HAWG .45
Product Code: RHX1045E

New Lite Hawgs

The best Hawg for you may just be one of these with an integral light rail, so you can positively identify your target in low light. The new Lite Hawgs give you a choice of ten rounds of .45 ACP or a dozen rounds of 9mm in the magazine. The X2 combination mini-light and laser from Insight Technology is sold separately.

STAINLESS WARTHOG
Product Code: WHX1045S

NEW

FEAR NO RUST

Now the world's most famous micro-1911, the Warthog, comes in all weather stainless steel, so you don't have to fear rust when duty calls and it's your job to go out there. Like all Warthogs, the new Stainless Warthog comes with a match-grade ramped barrel, Power Extractor and Para bushingless recoil spring assembly. Integral to all the frames are the plunger tubes and grip screw bushings.

The Stainless Warthog offers you more than just rust resistance; the added heft of the solid stainless steel frame gives you more weight in your hand for better recoil control when shooting one fast shot after another.

THE BEST SERVICE POLICY

At Para, we believe that providing you with the best pistol means that we will stand behind that pistol 100% for as long as you own it. We will provide the original retail purchaser of any one of our pistols with all necessary service, free of charge, for the lifetime of the pistol, where adjustment or repair is required due to some defect in materials or workmanship.

STAINLESS WARTHOG
WHX1045S

NEW

The new Stainless Warthog is made of rust resistant stainless steel with our classic brushed finish. This Hawg, like the original Warthog, holds 10+1 rounds of powerful .45 ACP. The stainless frame adds 7-ounces of muscle to this pistol to help soak up recoil.

HAWG 9
WHX129R*

The Hawg 9 redefines "high-capacity" by giving you a full 12*+1 rounds of stopping power in a micro-compact frame. This pistol features Para's Regal finish, is chambered for the popular 9mm Luger cartridge and has our light-weight alloy frame.

LITE HAWG 9
RHX129E*

NEW

The new Lite Hawg 9, with its built-in light rail, gives you positive target acquisition regardless of the situation. The non-reflective Covert Black finish protects your pistol and won't chip or fade. This pistol holds 12*+1 rounds of 9mm firepower.

*Where restricted, models available with 10-round magazines.

The Best Triggers

The Para match-grade trigger with overtravel stop eliminates backlash for a clean, crisp break. Combine this with Para's competition hammer, which is skeletonized for quicker lock time, and each bullet is launched precisely upon your command. Align the sights, press the trigger, and hit your target. The best trigger brings out the champion in you.

NEW

SSP-SE1
Product Code:
PX745E MB

1911 SSP
Product Code: PX938P
Caliber: .38 Super

NEW

PXT™ SINGLE-ACTION, SINGLE STACK

The Para Power Extractor™ is the revolution that created the ultimate 1911. Para's PXT technology eliminated the one weakness in the original 1911 design. Its massive Power Extractor gives you improved feeding and positive extraction of every round, shot after shot.

The newest PXT high-performance pistol, chambered for the powerful .45 ACP cartridge, is the full-size SSP-SE1. But like all Para PXT 1911s, our first Special Edition pistol is for shooters. It has the custom extras you have most often asked us for, such as an ambidextrous safety, full-length guide rod, three white-dot sights with the Novak Extreme Duty® adjustable rear sight and two eight-round magazines. The classic beauty of our new Midnight Blue Para Kote finish and the stunning elegance of our Triple-A fancy cocobolo stocks will turn heads when you take this pistol out at the range and proceed to beat the competition.

And now, Para has given you yet another beautiful choice, this one is the PXT 1911 SSP in .38 Super with our new Bright Stainless finish and tough synthetic Mother of Pearl stocks (pictured above).

OPS
PCWX745S

If you're looking for a pistol to have in your operations center that is comparable with a full-size single-action, single stack duty pistol, then the Para OPS is for you. The super compact OPS has a 3.5-inch barrel and features the new GRIPTOR™ grasping grooves which give your hand more holding surface on the front strap of the pistol and help you to naturally control recoil.

LTC
PCX745E

The Para LTC is the PXT version of the most popular 1911 compact pistol in the world. It has a 4.25-inch barrel on a full-size frame. All Para pistols come with two magazines, and on models with a full-size, single stack frame you get one that holds the standard seven rounds of .45 ACP and a second one that holds eight rounds. This pistol is also available in all-weather stainless steel (Product Code: PCX745S).

1911 SSP
PX745E

All PXT models give you more value for your money than any other 1911, thanks to custom extras that are standard such as match-grade ramped barrels, beavertail grip safeties, extended slide lock safeties, competition triggers and hammers. The SSP adds a full-length guide rod, three white-dot fixed sights and our durable Regal finish.

P18-9
Product Code:
PX189S

The Best Shot

Para is the only manufacturer that allows you to make your best shot every shot because all of our pistols come standard with match grade, integral ramped barrels.

PXT™ SINGLE-ACTION, HIGH CAPACITY

Todd Jarrett has been winning National and World Championships with Para pistols for over 15 years. No matter what level you compete on, you want the best equipment. Para's solid steel high capacity frame has stood the test of time and durability, as well as being a proven winner in both the shooting sports and in the field.

The Para Hi-Cap PXT™ has more custom extras as standard equipment than any other high capacity pistol in its class. From a full-length guide rod at the muzzle to the competition hammer at the rear of the slide, Para Power Extractor PXT pistols are loaded with extras including a match trigger, flared ejection port, extended slide lock safety, beavertail grip safety and ultra-thin durable polymer stocks.

One of the keys to winning any handgun match are sights you can see. Para offers you the choice of high-visibility, low-mount, dovetailed, three-dot fixed sights or an adjustable competition rear sight and fixed front sight.

Only Para, with our ramped barrels and the patented Power Extractor technology for ultimate reliability and accuracy, gives you the winning edge. Dollar for dollar you just get more for your money with a Para pistol.

P14-45
PX1445S*

The P14-45 has become the standard in high capacity big-bore pistols with 14*+1 rounds of .45 ACP firepower. In rust-resistant stainless steel with a classic brushed finish, the P14-45 gives you rugged reliability with three-dot fixed sights for easy targeting.

MIDNIGHT BLUE
P14-45
PX1445E MB*

Para created a legend with the invention of the P14-45. But we never rest, because you need the best with the latest technology, like our new Power Extractor that delivers ultimate reliability to you. The Midnight Blue P14-45 provides you with the best looking, best performing .45 ACP pistol thanks to its new Para Kote™ Midnight Blue finish that is as tough as it is elegant.

P18-9
PX189S*

The full-size Para P18-9 offers the highest capacity, 18*+1 rounds, of any 9mm handgun produced today. This Para pistol gives you the winning combination of mild recoil with its full-size stainless steel frame, and a great sight picture from the fully adjustable rear sight.

*Where restricted, models available with 10-round magazines.

S14•45 LIMITED
Product Code: SX1445S

The Best Sights

To hit your target, and to hit it quickly, your pistol needs to have highly visible sights. The Para Limited pistols provide you with the ultimate sight picture that is adjustable for your ammunition.

NEW
TODD JARRETT USPSA LIMITED EDITION .40
Product Code: SX1640J

HI-CAPACITY SINGLE-ACTION LIMITED

Para pistols have always been known for outstanding out-of-the-box performance, from the first shot to the last. But Para is constantly striving to give you more options.

That's why Para offers our Limited Series models... a total package that includes all the most-asked-for custom features for a fraction of the price. Each Limited pistol has a full-length recoil guide system that eliminates spring bind. Front and rear slide serrations make for easier slide retraction. The competition trigger with an overtravel stop eliminates backlash and the ambidextrous safety facilitates southpaw or "support hand" shooting.

All our Limiteds come with an adjustable rear sight, either the target model with a broad flat blade that is easily adjustable for windage and elevation, or the rugged Novak Extreme Duty® adjustable rear sight.

Para is a company of champions, and World Class shooter Todd Jarrett has designed the ultimate Para pistol to bring out the champion in you (pictured above, Product Code: SX1640J). When you purchase a Todd Jarrett pistol, a portion of the proceeds go directly to USPSA, helping ensure that the shooting sports will continue for future generations of handgun owners.

S12•45 LTD
SX1245S*

When you want all of the extras of a Para Limited in a 3.5-inch barreled pistol, the S12•45 Limited is for you. In addition to 12*+1 rounds of .45 ACP firepower in a sub-compact frame, it has the durability needed in the field. Built for the accuracy of competition, you get the snag-free Novak Extreme Duty® rear sight along with the feeding and extracting reliability of the Power Extractor.

TODD JARRETT USPSA LIMITED EDITION .40
SX1640J*

This customized competition pistol features Novak Extreme Duty® adjustable rear sight combined with a fiber optic front sight which absorbs light to give you the best sight picture even at dusk. It also has a magazine well as cavernous as "Jaws" so you can smoke reloads like Todd.

COVERT BLACK S16•40 LTD
SX1640E*

The Covert Black S16•40 Limited is the pistol that Todd started with to create his USPSA Limited Edition Para. This is the most affordable out-of-the-box practical shooting competition pistol. The S16•40 Limited is also available in Para's Sterling finish so your pistol can look as good as you shoot.

*Where restricted, models available with 10-round magazines.

**COVERT BLACK
CARRY**
Product Code:
CWX645B

Novak Sights from Para

Novak's Extreme Duty® adjustable rear sight is available on the Covert Black Carry and other select models. The Novak sight has tough sides to protect the wide, rear sight blade giving you the precision of a target sight picture with the durability of a fixed sight. And, the sight has Novak's famous snag-free contours for easy carry.

CCO
Product Code:
CWX745S

LDA SINGLE STACK CARRY OPTION™

When you're going undercover, you need a carry pistol that is compact and easy to conceal. Now, Para brings you GRIPTOR™ grasping grooves, located on the slide and front strap of every Single Stack Carry Option pistol. These grooves give your hand more grasping surface. They naturally help you to control recoil during rapid fire.

Gun World editor, Jan Libourel said, "I now think the Griptor is ... the best treatment for an auto pistol's front strap I have ever tried. The Griptor really works well."

Para's award-winning Carry Safe™ line of pistols with their triple safety system let you carry them hammer-down but ready for action when needed. And all of the Para Carry Option pistols have flush hammers and a rounded grip safety to prevent snagging on clothing. Add the reliability of the Para Power Extractor™ and the LDA's sweet trigger and you have a series of carry pistols that can't be beat.

CARRY
CWX645S

The award-winning Para Carry, measuring just 6.5 inches long and 4.75 inches high, was declared the "World's Smallest DAO .45 Auto" by the editors of *GUNS & AMMO* magazine when it was introduced in 2001. Yet this small pistol also proves to be remarkably controllable, thanks to the Griptor grasping grooves and smooth pull of the LDA trigger.

CCO
CWX745S

With its 3.5-inch barrel and extra concealability features, this may well be the ultimate defensive handgun. This one has it all... 7+1 rounds of .45 ACP, flush hammer and bobbed beavertail, low-profile slide lock and the new Griptor grasping grooves on the front strap of the pistol that aid in controlling recoil during rapid fire.

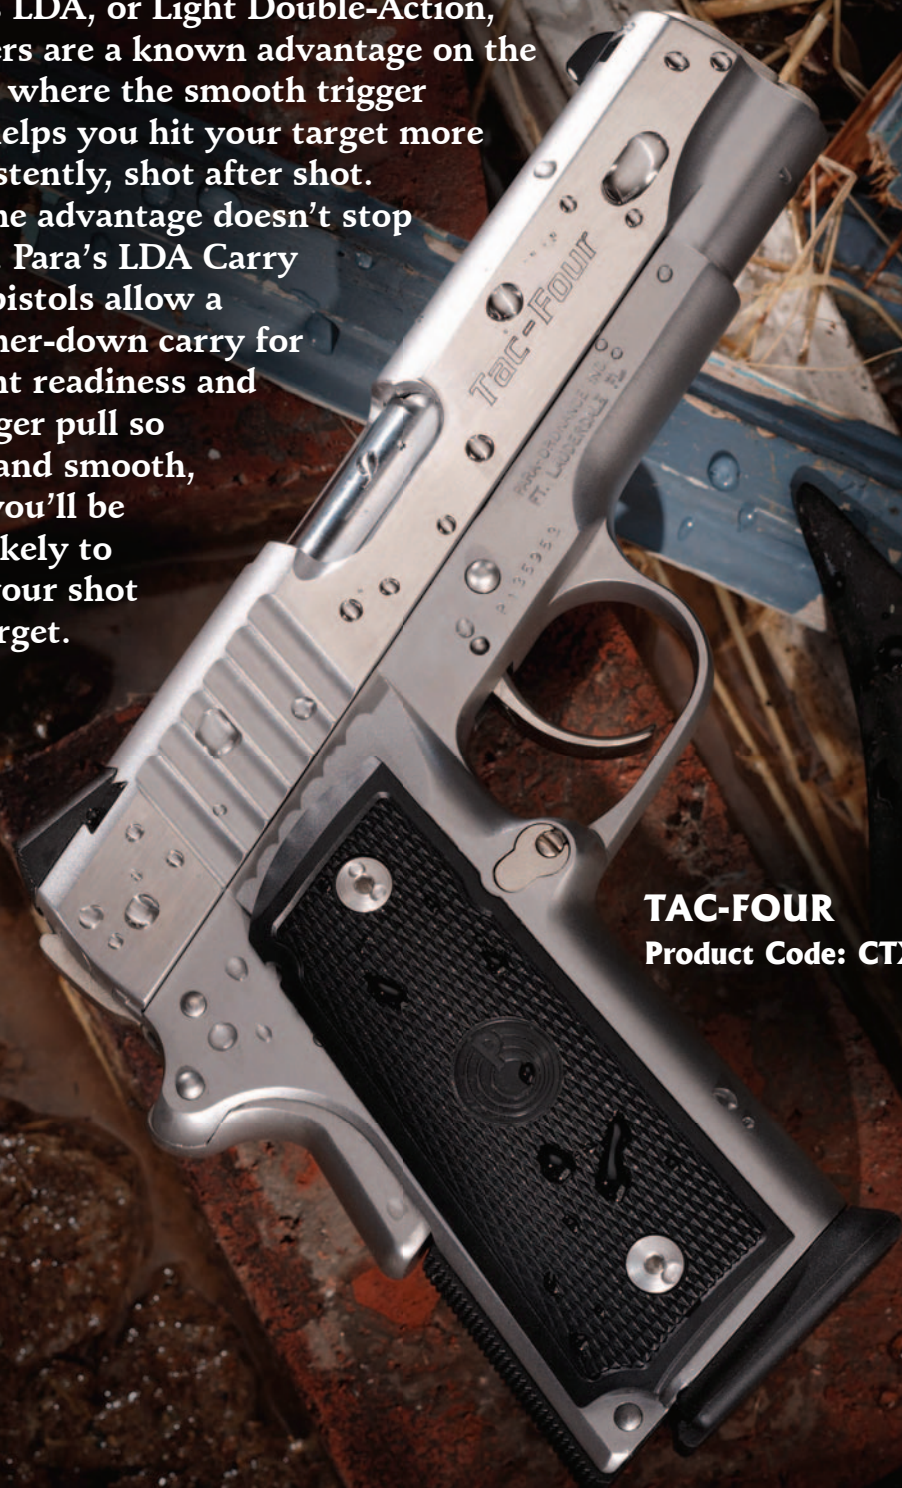

CCW
CCWX745S

Winner of the 2003 *GUNS & AMMO* Gun of the Year Award, the Para CCW is one of a special series of single stack LDA autos engineered to offer the ideal balance between concealability and shootability, and what handgun writer Wiley Clapp refers to as perhaps "the optimum concealed carry pistol." The 4.25-inch barrel and noticeably short pistol butt make for a compact handgun that's easy to carry.

A Trigger for All Seasons

Para's LDA, or Light Double-Action, triggers are a known advantage on the range where the smooth trigger pull helps you hit your target more consistently, shot after shot. But the advantage doesn't stop there. Para's LDA Carry Safe pistols allow a hammer-down carry for instant readiness and a trigger pull so light and smooth, that you'll be less likely to jerk your shot off target.

TAC-FOUR
Product Code: CTX13455

CARRY 12
Product Code: CTX1245N

HI-CAP CARRY OPTION™

Para is the company that made High Capacity and Light Double-Action synonymous with .45 ACP. Para's Carry Option pistols are the ultimate defensive handguns thanks to the security and shootability of the LDA trigger system plus recoil absorbing, solid stainless steel construction in a compact package.

At Para, we want to give you the option of carrying the best with no compromise, that's why Para gives you the most choices – from ultra flat, single stack to high capacity carry pistols. And only Para Carry Safe™ pistols give you the confidence of a hammer-down carry with the assurance of our triple safety system on all LDA pistols.

Because there are times when every round counts, Para's new Carry Option pistols give you the advantage of high capacity magazines with 12 and 13 rounds of proven .45 ACP stopping power. Combine that with features such as a flush hammer and bobbed beavertail for concealability, add the reliability of Para's Power Extractor™ technology, and you've got a defensive handgun that gives you the winning edge.

CARRY 12
CTX1245N*

Para's Carry 12 is one of the most powerful carry pistols on the market today. With a 3.5-inch barrel and 12*+1 rounds of .45 ACP, you get a gun that is easy to conceal but won't make you sacrifice any fire-power. And it comes standard with low-mount, three-dot tritium night sights for easier target acquisition regardless of the situation.

TAC-FOUR
CTX13455*

Although the Tac-Four is designed as a defensive handgun, don't be surprised at competition-level results when you take it to the range... the remarkable anti-flinch LDA trigger system is that good! The flush hammer and bobbed beavertail make for a more concealable, snag-free and easy-drawing package.

TRITIUM NIGHT SIGHTS

For varying light conditions, the Carry 12 comes with three-dot tritium night sights as standard so you can see your sights under even the most demanding of situations. The Para Customer Service Center can install these sights on other fixed-sight models as well.

*Where restricted, models available with 10-round magazines.

Practical shooting will never be the same...

...INTRODUCING THE LIMITED EDITION TODD JARRETT/USPSA PISTOLS

In 2006, USPSA will kick off a new division for 1911 Single Stack pistols. The Todd Jarrett/USPSA Limited Edition .45 is the perfect pistol for you to win your class in this new division at your local USPSA club. Here are the features that Todd specified for this classic single stack 1911 to give you the Para winning edge:

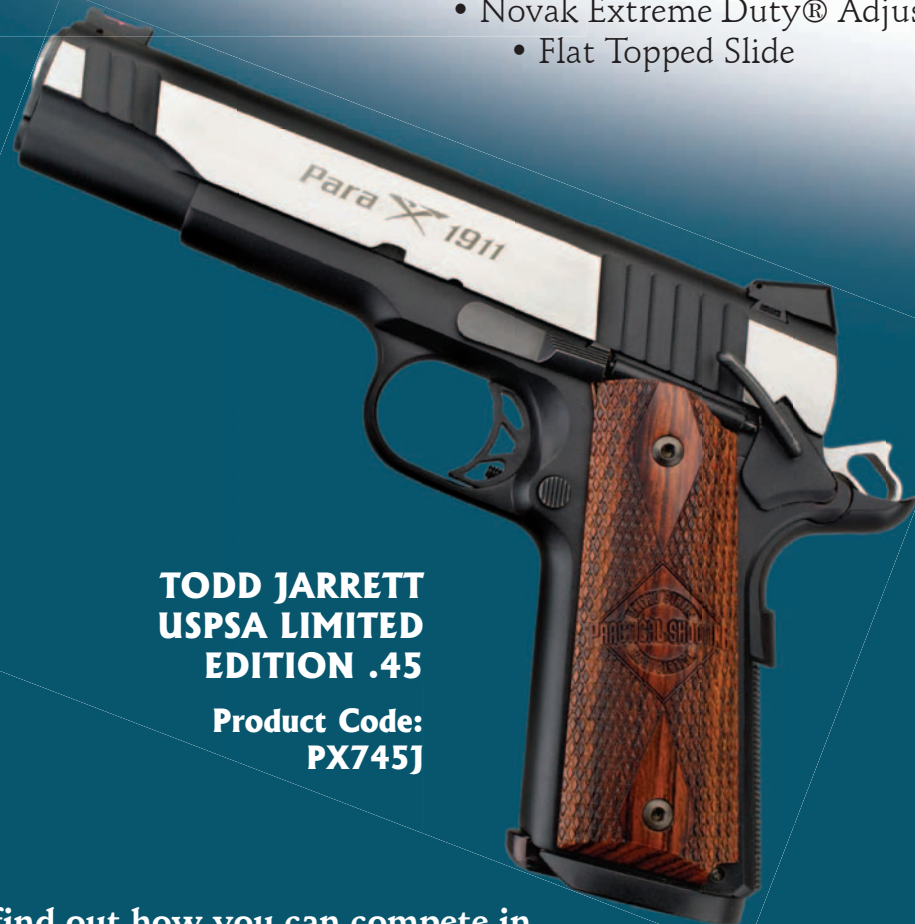

- Para Ambidextrous Safety
- Ed Brown Match-Grade Barrel Bushing, Slide Stop
- Cylinder & Slide Stainless Tactical II Hammer, Sear, Disconnecter
- Duo-Tone Para Kote™ Finish – Sterling Top, Covert Black Frame
- Para Extended Grip Safety with Speed Bump
- Ed Brown Mainspring Housing and Magwell
- Dawson Interchangeable Fiber Optic Front Sight
 - Two Eight-Round Magazines with Alloy Bumper Pads
 - Novak Extreme Duty® Adjustable Rear Sight
 - Flat Topped Slide

Todd loves to shoot the Limited Division, and he competes in it at the Steel Challenge, World Speed Shooting Championships, as well as in USPSA competition. Based on our popular S16•40 Limited model, Todd created this USPSA High Capacity .40 caliber for you to race with at your local club or the USPSA Limited Nationals. This pistol features:

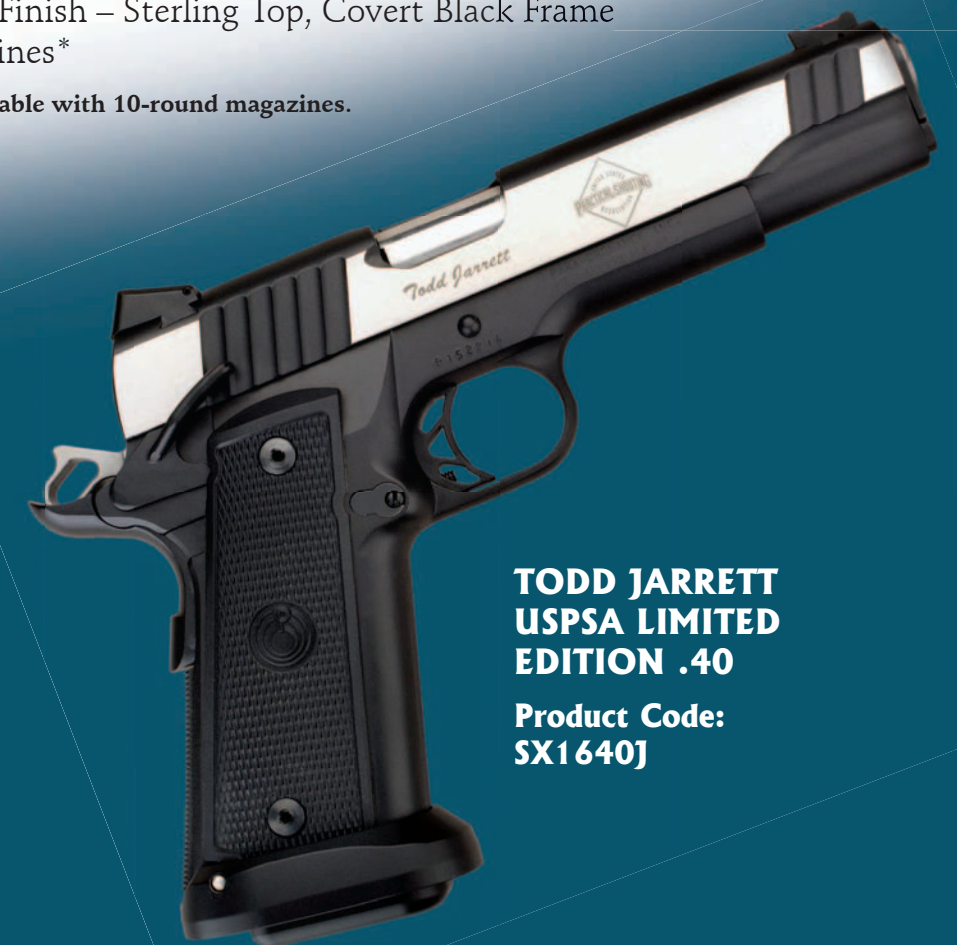

- Para Ambidextrous Safety
- Ed Brown Match-Grade Barrel Bushing
- Cylinder & Slide Stainless Tactical II Hammer, Sear, Disconnecter
 - Para Extended Grip Safety with Speed Bump
 - Dawson Precision “Ice” Magwell
 - Dawson Interchangeable Fiber Optic Front Sight
 - Novak Extreme Duty® Adjustable Rear Sight
 - Flat Topped Slide
 - Duo-Tone Para Kote™ Finish – Sterling Top, Covert Black Frame
 - Two 16-Round Magazines*

*Where restricted, models available with 10-round magazines.

The Best Grips

Para uses only premium cocobolo for our wood stocks. Cocobolo has twice the density of walnut making it the wood of choice for the best handgun stocks. Its natural color ranges from red-orange to deep burgundy. We checker it with the classic double-diamond pattern and insert the Para gold medallion in the center of the stocks.

LDA SSP
Product Code:
DX745S

LDA SINGLE STACK

While many people in the industry have tried to create a double-action autoloading pistol, they have always had to struggle against the heavy trigger pull that was required to cock and release the hammer. But it was the genius of Para that finally broke through the old way of thinking. Para refused to accept that a double-action trigger had to be long and heavy, making it hard to hit your target.

Para's light double-action (LDA) trigger system gives you the smoothest trigger you have ever felt on a double-action handgun of any kind, whether it is a revolver or an autoloader.

The LDA was not invented to replace the single-action trigger on the 1911 pistol. We could have put the LDA trigger into any style of pistol. We consider the ergonomics of the 1911-type pistol to be the best in the world for an autoloading pistol.

For those who must have a hammer-down carry, or just prefer a double-action trigger, we give you the LDA with its natural stroke that is consistent every pull. It is the sweetest trigger you have ever tried!

BLACK WATCH COMPANION
CX745S

The Black Watch Companion combines great looks, single stack slimness, and, chambered in the potent .45 ACP caliber, it is a defensive pistol worthy of protecting a king. The Black Watch Companion has Para's ultimate Light Double-Action (LDA) trigger system, and holds 7+1 rounds of .45 firepower.

TAC-S
DCX745E

The Tac-S is the single stack version of Para's best selling high capacity LDA, the Tac-Four. You get the great feel of a 1911-style pistol with a trigger that makes you a better marksman. The Tac-S gives you 7+1 rounds of potent .45 ACP firepower, solid steel construction, and the security and shootability of the LDA trigger system.

LIMITED
TX745S

Start with the natural balance and pointability of Para's Single-Stack LDA pistols and add the performance-enhancing custom-shop extras of the Limited Series; the result is the peerless Para Limited. Built-in features include premium match-grade barrel, competition hammer, front and rear slide serrations, tuned trigger, trigger overtravel stop, adjustable rear sight and ambidextrous safety.

SWAT

TAC-FIVE
Product Code: CTX189B

HI-CAP .45
Product Code: DX1445S

COLONEL
DCX1445E*

High capacity firepower just got easier to carry with the introduction of Para's Colonel. This LDA pistol has a shortened slide and barrel, but still gives you a full 14*+1 rounds of powerful .45 ACP firepower. Whether you're on a mission overseas or in the middle of a stakeout at home, the non-reflective olive drab Spec Ops finish will give your pistol unlimited protection.

HI-CAP .45
DX1445S*

This full-size semi-auto incorporates the three vital LDA safety features: a thumb safety that disengages the trigger; a grip safety that locks the hammer assembly; and an internal firing-pin-block to guard against the possibility of accidental discharge. The Hi-Cap .45 is also available in Para's Covert Black finish.

COVERT BLACK
HI-CAP 9
DX189E*

The Covert Black Hi-Cap 9 combines an impressive 18+1* rounds of 9mm firepower with the advanced LDA trigger, giving you a high-power pistol that's both accurate and reliable. The Hi-Cap 9 is also available in Para's stainless finish (Product Code: DX189S).

*Where restricted, models available with 10-round magazines.

LDA HI-CAPACITY

The new Tac-Five was designed to meet the needs of those special operations groups that use the 9mm cartridge. Its five-inch barrel gets the most velocity out of the high tech specialty loadings of this universal cartridge. Only Para offers an 18-round 9mm pistol on the 1911-style platform with an integral ramp barrel that allows for 9mm +P loadings.

The Light Double-Action (LDA) trigger system provides instant first shot capability for a secure hammer-down carry whether you are fast roping out of a helicopter or boarding a boat at sea. Best of all, the natural stroke of the LDA trigger gives you perfect shot-to-shot consistency every time.

The LDA, coupled with the tough Novak Extreme Duty® rear sight, ensures hits when you need them the most. An integral tactical size magazine well makes for fast reloads under stress. The Tac-Five is made of rust-resistant stainless steel and topped with our durable Covert Black Para Kote finish to increase its all-weather, day or night service.

The Best Finishes

From the classic brushed stainless finish of pistols like the Hi-Cap .45 (page 23, Product Code DX1445S) to the new Para Tac-Five with its Covert Black Para Kote™ finish, Para pistols are ready for duty. Para Kote's combination of elasticity and hardness creates a finish impervious to impact, scratching and the elements.

The Best Double-Tap

The famous "Double-Tap" is the requirement on most USPSA/IPSC targets. Practical shooters train to place two shots with two flash sight pictures as quickly as possible on the cardboard targets. Shoot too fast and you get one A and one B or C, or even worse, one A and a miss. The natural stroke of the LDA trigger gives you an extra couple of hundredths of a second between flash sight pictures—just long enough to let the front sight settle in the rear notch giving you two A hits. Winning is Sweet.

HI-CAP LTD .45

Product Code:
TX1445S

LDA HI-CAP LIMITED

The Para LDA High Capacity Limited pistols are the best of the best. You have the winning advantage of the remarkable Light Double-Action trigger, combined with our famous high capacity frame and all the extra features you would expect from a custom shop pistol.

You can purchase a Para pistol with confidence, knowing that Para maintains the highest quality control standard in the firearms industry – bar none! While several competitors boast that their barrels are air-gauged to verify consistency within one thousandth of an inch (.001"), Para works to a match-grade plus or minus four ten-thousandths of an inch (+/- .0004").

Para's Limited LDA models have been especially popular with those who protect our communities and the nation by serving in law enforcement. The Limited LDAs, with extras standard like ambidextrous safety and adjustable sights in highly effective calibers like .40 S&W and .45 ACP as well as 9mm, bring out the best marksman in you. So whether you're on duty, or shooting competitively on the range, you can rest at ease, knowing that your pistol will never give you anything less than the best.

HI-CAP
LTD .45
TX1445S*

The Hi-Cap Limited .45 gives you the latest in shooting technology. This superb pistol holds 14*+1 rounds of powerful .45 ACP, has an incomparably light double-action trigger pull, and includes as standard all of the extras that will make you a better shooter.

HI-CAP
LTD .40
TX1640S*

Included as standard in this .40 S&W caliber pistol are features like a premium match-grade barrel, competition hammer, front and rear slide serrations, tuned trigger, trigger overtravel stop, adjustable rear sight, ambidextrous safety, and of course the increased reliability and extraction that only comes from Para's new Power Extractor technology.

COVERT BLACK
HI-CAP LTD 9
TX189E*

This is a fun pistol to hit plates or any target on the range. Shoot your best with a Covert Black Hi-Cap Limited 9 and look forward to taking home the trophy at your local match. The LDA trigger system offers a sweet, smooth trigger pull with every shot. This pistol is also available in Para's Sterling finish (Product Code: TX189S).

LIGHT THE NIGHT:

No Targets Unseen!

Now, Para has created the ultimate duty pistol with the addition of our universal light rail to both Para's LDA high capacity pistols, and to classic single stack models. The new Para Nite-Tac cuts through the darkness and illuminates your subject for positive threat identification. Lights sold separately.

ON DUTY WITH PARA

There are places no one wants to go: dark, dangerous and with uncertain destiny at the other end. Para builds tough guns for tough guys who defend and protect the common good.

Para's new series of universal light rail pistols are designed to help ensure positive targeting and threat identification no matter where duty takes you. And now, with the addition of the light rail to both single-action and LDA pistols, you can be sure to get the best pistol in any situation. Many agencies have already tested and approved Para for both on- and off-duty use; perhaps your agency should find out why.

INDIVIDUAL OFFICER PURCHASE

For those in Law Enforcement who have to purchase their own duty pistols, or simply choose to carry the latest technology, Para has the easiest program in the industry for you. We have a special Individual Officer Purchase Kit that you can use at any storefront gun shop in the country. Everything about this program is tailored for you, the Law Enforcement professional. Call us today to receive your Para Individual Officer Purchase Kit.

RX1640S*

NEW

The Nite-Tac .40 gives you another choice, offering the light rail on this full-size .40 S&W caliber pistol. Each Nite-Tac has a five-inch barrel, three-dot fixed sights and weighs 41 ounces empty without a light attached. Lights are sold separately.

NITE-TAC 9
RX1895*

NEW

The Nite-Tac 9, with 18*+1 rounds, gives you the ultimate high capacity pistol. It has a thin grip, a beavertail safety, improved sights, a flared ejection port and of course our universal light rail. Lights are sold separately.

*Where restricted, models available with 10-round magazines.

MIDNIGHT BLUE
P14•45
Product Code:
PX1445E MB

WE MAKE YOU THE BEST...

... handguns, so you can be the best at what you do—whether it be in competition, law enforcement or self-defense. It was the genius of Para that created the first production high capacity .45 ACP pistol, the P14•45. But we never rest on our laurels and today's P14•45 is the best pistol we can build. It now carries 21st Century technology with the Power Extractor™ for unequaled reliability in feeding and extraction. Every Para pistol has our match grade integral ramped barrel for the accuracy you need on the range or in the field.

Every Para pistol, like the newest P14•45, comes standard with

The massive claw of the Power Extractor, right, is 50% larger than a conventional extractor, left, giving you positive feeding and extraction every shot.

custom extras that will help you become the best shooter you can be. These include our easy-to-depress beavertail grip safety, extended slide lock safety, match-grade trigger with overtravel adjustment, skeletonized spur hammer for fast lock time and the best sight picture from our three white-dot fixed or adjustable sights.

The 2006 Para P14•45 comes with our new Midnight Blue Para Kote™ finish to give you a pistol that looks as good as it shoots. And all of this is backed with the best lifetime service policy in the firearms industry. You simply get more value for your money with today's Para pistols.

PARA PRO SHOP

The Para Pro Shop is your source in the U.S.A. for original Para-Ordnance factory magazines, including some models of pre-ban high capacity magazines. We also supply factory replacement tubes for original Para magazines. The Para Pro Shop has added Para wearing apparel and other Para logo accessories for shooters. The Para Pro Shop is a division of Para-Ordnance, Inc. and some items may not be able to be shipped outside the United States.

A. Para PXT Green Polo Shirt - Product# 0000900

This shirt has embroidered Para and PXT logos on it. Sizes M-XL.

B. Leather Waistbelt Pack with Holster Pocket - Product# 0001000

This waistbelt pack has four zippered pockets.

C. Para PXT Tan Cap - Product# 0000800

Tan cap with embroidered Para and PXT logos on it. One size fits all.

D. Para Range Bag, Single Pistol - Product# 0001100

Nylon range bag with three zippered pockets and pouches for seven magazines.

MAGAZINES

The Pro Shop offers a full selection of factory magazines for every type of Para pistol. Use the chart below to determine the appropriate magazine for your model pistol.

WE MAKE YOU THE BEST...

...1911-style pistols because that is your passion and ours. Many of you have told us about your love for the 1911 pistol and we believe, as you do, that it is the best platform for an autoloading pistol. I can not help but muse about John Browning and wonder if he ever dreamed of all of the different variations that have spun off his original design.

What would he think of my favorite pistol, the little Warthog, with its three-inch barrel and double-column magazine? I think he would be smiling because he knew how difficult it would be to make an autoloading pistol in a big bore cartridge like the .45 ACP run smoothly. I have the advantage of computer-aided design and aerospace quality molds to create parts that he could not have made with the technology of his day.

One of our achievements in taking advantage of 21st Century technology was the creation of the Power Extractor. We were able to make an extractor that increased the size of the claw, had constant spring tension and maintained the classic lines of the 1911 slide.

In the development of the LDA trigger system I could have made a frame with a different look, but to what advantage? I have always felt that the grip angle of the 1911 was the ultimate for a handgun. It was not our intention for the LDA to replace the Single-Action trigger system in the 1911 but rather to give those who needed a double-action trigger with a hammer down carry the option of having one in the world's best frame.

There have been times when I have strayed from the traditional look of the 1911 but it was always to improve the pistol to make it better for you to shoot. I am speaking of the Griptor™ grasping grooves on the front strap of our short-barreled models. Anyone who has shot a short-barreled big bore handgun knows that the fast cyclical time of the slide makes the pistol kick hard and flip up in your hands.

I am pleased to see that Gun World Editor, Jan Libourel, understands the advantage of Griptor. He said, "When I first saw Para pistols with the Griptor, they were jarring to my traditional sensibilities..." But after shooting an OPS model with Griptor, Libourel said, "...I'll have to admit to revising my opinion dramatically. I now think the Griptor is very probably the best treatment for an auto pistol's front strap I have ever tried. The Griptor really works well."

We are a family of passionate 1911 shooting enthusiasts and one member of our family is Todd Jarrett, a world-class shooter. It is his passion for practical shooting that has led to the creation of two pistols for shooting those sports. We are proud to be producing two pistols that he helped design. A portion of the sales of those pistols goes toward supporting the United States Practical Shooting Association so that future generations may enjoy the shooting sports. In 2006, we will continue to make you the best pistols so that the champion in you can have the winning edge.
