

SAKO RIFLES

SAKO. Best-quality custom rifles at production price.

Buying a rifle is always an exciting experience. But with all the brands out there, with each manufacturer promising the moon, this experience also involves making decisions that are often tricky and difficult.

So why buy a Sako rifle?

We want to present you the resume of Sako rifles. Objectively. Dispassionately. We are confident that when you are done reviewing it, you will see why Sako is regarded as a truly custom rifle at production price. And you will understand why at Beretta we are proud to call this brand a prominent part of our family.

SAKO QUAD

When we first saw this new Sako creation, even we were speechless. One rifle. Four quickly-interchangeable barrels in four rimfire calibers. Impeccable design. Super-smooth action with a 50-degree bolt-lift. Perfect trigger. Ergonomic stock with ambidextrous palm-swell. Adjustable butt-pad system. In a word: awesome.

The concept of the Quad started a couple years ago, when we asked Sako to solve this dilemma. When shooters buy a rimfire rifle they want performance, innovation and versatility. How can we

offer them all of this while allowing them to enjoy the new exciting rimfire calibers that have been springing up of late?

The answer surpassed all our expectations. The Sako Quad has one receiver that fits four different barrels. The barrels are easy to interchange. Just the turn of one torque-screw at the bottom of the receiver gives a rock solid mount resulting in the kind of Sako accuracy that is world famous. Barrel change takes no more than twenty seconds – and this having never done it before!

SAKO QUAD

The four calibers for which we have chambered the Sako Quad are the timeless 22LR, the powerful 22 WMR and the new zippy 17 HMR and 17 Mach 2. You can purchase one rifle chambered for your favorite rimfire cartridge (and get the extra barrels as accessories when it suits your fancy) or you can buy the Quad as a “combo” set, with all four barrels.

The action is a brand-new Sako Rimfire action, with a 50-degree bolt-lift. It is designed to blend with the stock as one – flowing lines that will please the traditionalist and innovator alike. The quick-detachable 5-shot magazine comes in two versions: one for the 22LR and 17 Mach 2, the other for the 22 WMR and the 17 HMR. The stock is fiberglass-reinforced polypropylene, featuring new Giugiaro styling, ambidextrous palm-swell and an adjustable butt-pad system.

SAKO QUAD
JRSR101
(BURRIS SCOPE NOT INCLUDED)

QUAD MAGAZINES ARE BUILT WITH SAFETY IN MIND, AND WILL ONLY FIT THE CORRECT-CALIBER BARREL. THIS WAY, YOU WILL ALWAYS BE USING THE CORRECT AMMUNITION FOR EACH OF THE FOUR INTERCHANGEABLE BARRELS.

THE STOCK DESIGN IS HIGHLY ATTRACTIVE AND ERGONOMIC, COMBINING A TRADITIONAL AMERICAN STRAIGHT COMB WITH A YOUTHFUL GROOVE PATTERN.

SAKO 75 GREY WOLF

The newest addition to the Sako 75 hunting family, this rifle combines the warmth of wood with all the benefits of a stainless synthetic model. The barreled action is stainless (yes, even inside!), while the gray laminated stock offers an interesting texture to the eye, a natural feel to the hand and unbelievable resilience to the elements.

As with all Sako 75 models, the Grey Wolf features a match-grade, cold-hammerforged barrel free-floated and hand-crowned at the muzzle. The trigger is adjustable from 2 to 4 lbs for maximum shooting comfort and accuracy, and the stainless-steel magazine is detachable. Available in the four smallest action sizes – I, III, IV and SM.

SAKO 75 CUSTOM SINGLE SHOT

The hyper-accurate Custom Single Shot rifle features a heavy, fluted stainless steel barrel and a rock-solid laminated stock with a beavertail fore-end. This rifle was designed for the most demanding bench-rest shooters and varmint hunters, who are rightfully demanding in their choices. As with our other stainless rifles, the inside components of the Sako Custom Single Shot are stainless.

The trigger is of the single set type. If pushed forward, it "sets" to be released with a super-light 7.5 oz pressure.

SAKO 75 DELUXE

Since the time of 19th-Century gentlemen hunters, the perfect mating of deep blue steel and richly figured wood has been a feature prized by experts. And this is the exactness of fitting and the richness of textures that we have recaptured with the Sako 75 Deluxe.

The barreled action's tough, forged metal is finished with a deep classic blue that is as attractive as it is long-lasting and durable. The gloss-finish stock is made of select-quality walnut, and it features a traditional rosewood fore-end tip and grip-cap. The buttplate is made of the same red rubber that has graced premium rifles for over a century. Other traditional features include game-engraved hinged floorplate.

SAKO 75 DELUXE

But one of our favorite features of the Sako 75 Deluxe is its hand-cut skip-line checkering. At Sako, we employ highly-skilled artisans who cut wood by hand in the true Finnish tradition. Each has their own style, and while the overall pattern is the same, each artisan's hand results in a uniquely special work of art.

As with all Sako 75 rifles, the Deluxe is tested to shoot groups of 1 inch or less prior to shipping it to our valued customers.

SAKO 75 FINNLIGHT

Available in 17 calibers ranging from .22-250 to .375 H&H Mag. in four action lengths, there's a Stainless Synthetic or Finnlight for almost any game, anywhere, any time. As with all our stainless rifles, the Finnlight's inner parts are also stainless.

AT SAKO, WHEN WE CALL A RIFLE "STAINLESS", WE REALLY MEAN "STAINLESS". UNLIKE OUR COMPETITORS, WE MAKE EVEN THE INSIDE COMPONENTS OF THE ACTION STAINLESS, NOT JUST THE BARREL AND A FEW ACTION PARTS. THE DURABILITY THIS AFFORDS OUR RIFLES IS A TRUE ASSET FOR DEMANDING HUNTERS, AND IT IS YET ONE MORE REASON WHY SAKO RIFLES ARE RIGHTFULLY CONSIDERED PARAGONS OF UTILITY AND ENGINEERING INNOVATION.

SAKO 75 STAINLESS SYNTHETIC

When weather is at its worst, determined hunters know there's no substitute for the combination of a stainless steel barreled action and a synthetic stock. No matter how long a downpour drenches these rifles, they'll be ready!

Both rifles feature injection-molded stocks with rubber over-molding for a secure grip and a warm feel in the coldest, wettest conditions. The Stainless Synthetic has standard barrel weights and lengths,

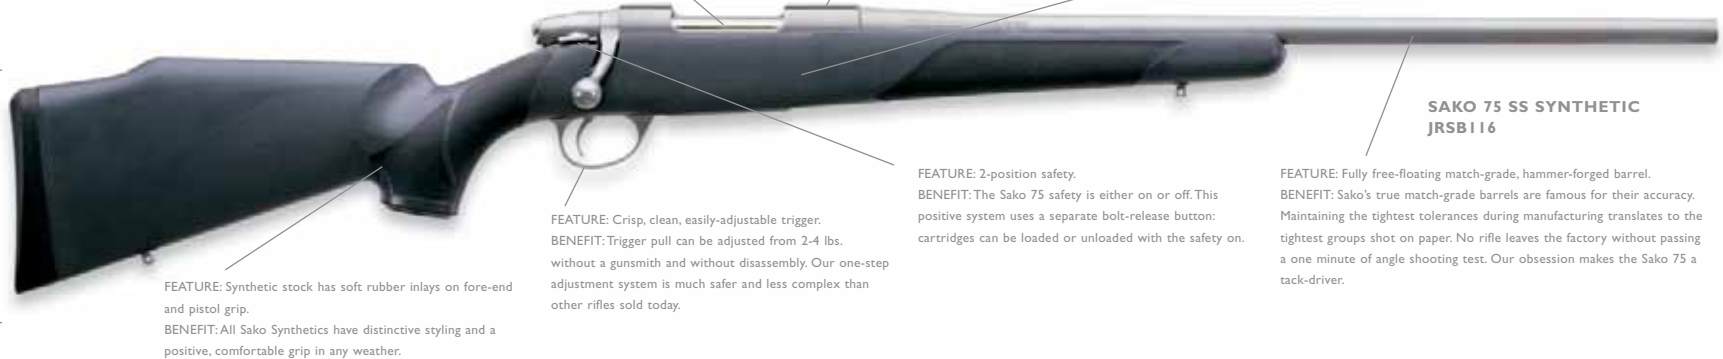

while the Finnlight uses shorter, lighter barrels to shave 1¼ pounds, a significant saving when hunting in mountain terrain or heavy cover. Available in many calibers ranging from .22-250 to .375 H&H Mag. in multiple actions, there's a Stainless Synthetic or Finnlight for almost any game, anywhere, any time. As with all our stainless rifles, the Finnlight's inner parts are also stainless.

FEATURE: Highest resale value.
BENEFIT: You won't want to part with your Sako, but it is good to know that Sako has one of the highest resale values of any bolt action rifle. A high-quality Sako is a good-quality investment.

FEATURE: One-piece forged bolt body with no-bind slots.
BENEFIT: The strength of the Sako 75 action is only outdone by its smooth, reliable feeding. Prove it to yourself, pick up a Sako 75 and cycle the action.

FEATURE: All-steel "Optilock" scope mounting system with unique tapered dovetail rails.
BENEFIT: Scope aligns perfectly with the barrel and will maintain zero in the roughest conditions.

FEATURE: Legendary all-steel Sako action with three massive locking lugs.
BENEFIT: The Sako 75 has one of the strongest, most torsionally-rigid actions made. Its durability and accuracy are unmatched making it perfect for even the hardest-hitting, heavy safari calibers. Five action sizes ensure optimal cartridge-to-action fit.

SAKO 75 SS SYNTHETIC
JRSB116

FEATURE: Synthetic stock has soft rubber inlays on fore-end and pistol grip.
BENEFIT: All Sako Synthetics have distinctive styling and a positive, comfortable grip in any weather.

FEATURE: Crisp, clean, easily-adjustable trigger.
BENEFIT: Trigger pull can be adjusted from 2-4 lbs. without a gunsmith and without disassembly. Our one-step adjustment system is much safer and less complex than other rifles sold today.

FEATURE: 2-position safety.
BENEFIT: The Sako 75 safety is either on or off. This positive system uses a separate bolt-release button: cartridges can be loaded or unloaded with the safety on.

FEATURE: Fully free-floating match-grade, hammer-forged barrel.
BENEFIT: Sako's true match-grade barrels are famous for their accuracy. Maintaining the tightest tolerances during manufacturing translates to the tightest groups shot on paper. No rifle leaves the factory without passing a one minute of angle shooting test. Our obsession makes the Sako 75 a tack-driver.

SAKO 75 HUNTER

Many riflemakers offer short and long actions, but Sako pioneered the concept of scaling the action to the cartridge. The 75 series rifles are available in five action lengths to accommodate everything from the .223 Rem. to the .375 H&H Mag. The newest is an action especially tailored for the .270 and .300 WSM cartridges. Combining a bolt throw optimized for the cartridge length with

the short bolt lift made possible by three locking lugs means there's no wasted motion in getting a follow-up shot. And with an action properly scaled to your chosen cartridge, you're not carrying any more rifle than you need — your shoulder will notice the difference at the end of a long hunting day.

SAKO 75 HUNTER LEFT-HAND

For years, left-handers could only look in envy at right-handed Sako owners. No more! The Sako 75 now is available in a true left-hand version. Three popular calibers, .25-06, .270 Win and .30-06 give the lefty the rifle he needs for everything from antelope to elk.

SAKO 75 HUNTER LEFT HAND
JRSP118

HIGH-GRADE WALNUT STOCK

ONE OF THE MOST WIDELY ACCLAIMED FEATURES OF THE SAKO 75 RIFLES IS THE PRECISION WITH WHICH EACH ACTION IS TAILORED TO THE CARTRIDGE. ACTION SIZE DESIGNED TO FIT THE POPULAR 270 WSM AND 300 WSM ARE AVAILABLE. NOW, SHOOTERS OF THESE FAST AND ACCURATE CARTRIDGES CAN RELY ON THE ABSOLUTE BEST ACTION ON THE MARKET TO MAXIMIZE THE EFFICIENCY AND THE PERFORMANCE OF THEIR FAVORITE ROUND.

SAKO 75 VARMINT

One of the things that sets us apart from our competitors is that we are always eager to listen to good ideas from our customers. One of these ideas was this: why not offer a single set trigger as standard in your varmint line? Another was this: why not offer the 260 Rem and the 204 Ruger calibers in your Varmint line? Inspired by these ideas we went to work and updated our Varmint line to include a single set trigger and the new calibers.

The way this single set trigger works is simple. If used normally, it functions like a standard Sako trigger, adjustable for weight of pull from 2 to 4 lbs. But after you cock the bolt, you can

push the trigger forward (instead of pulling it), thus “setting” it for an amazingly light 7.5 oz pull, making it ideal for target and precision varmint shooting.

Our set trigger is incredibly safe. If once you have set it you wish to return it to normal pull mode, all you have to do is engage the safety or lift the bolt: this will “unset” the trigger and make it safe for you to unload the rifle.

SAKO 75 VARMIT SS LAMINATED

This updated version of the older 75 Stainless Laminated features single set trigger, new calibers and fluted barrel. The barreled action is all stainless, making it more resistant to corrosion and rust. The barrel is a true varmint type – heavy, rigid and free-floating – and it is fluted for increased heat-dissipation. The stock is made of rigid and torsion-resistant laminated wood, thus blending

all the benefits of composite polymers with the warmth and looks of wood. Also, the stock features a true varmint-style beavertail fore-end for maximum shooting stability. This is one of the most attractive and accurate rifles in our lineup – now more than ever.

SAKO TRG 22

Nothing says “professional” like the TRG series. Whether you’re trying to win a CISM championship or you’re a police designated marksman, you’ll count on the accuracy the .308 Win TRG 22 brings straight out of the box. A free-floating heavy barrel and rugged composite stock mean no weather will stay this professional’s tool from delivering its payload. Cheekpiece and buttpad are adjustable

to tailor the TRG to your build. To complement the Sako TRG series a variety of accessories of the highest quality are available, such as muzzlebrake, bipod, mirage-sling, etc. Please see our accessories section for a complete list.

SAKO TRG 42

Sometimes you need to reach out a lot further. That's where the TRG 42 comes in. Chambered for the potent .300 Win. Mag. and the even more powerful .338 Lapua Mag., this is the rifle to reach for when ranges stretch a quarter-mile and more. Like the TRG 22, the stock is adjustable

to your specifications, and a detachable magazine makes reloads fast and sure. When you bring the TRG 42, you're ready for anything.

Sights	None
Weight	10 ¹ / ₄ lbs (TRG 22), 11 ¹ / ₄ lbs (TRG 42)

SAKO OPTILOCK SYSTEMS

SAKO OPTILOCK™

Even the best-made rifle is ultimately dependent on its sighting equipment. This is why the engineers at Sako have designed the Optilock™ system: a sturdy, all-steel anchor that locks the scope positively into place without damaging the scope body.

Optilock™ bases and rings are machined from a solid block of the same steel we use for our rifles. No inferior materials are ever used. Then, the pieces are individually cut using precision CNC machinery to ensure the most accurate tolerances. Lastly, a smooth polymer bearing is inserted into the rings. The bearing rotates freely, making scope alignment easier and ensuring that the scope body will never be scratched.

Once in place and sighted in, Optilock™ rings and bases are the most trouble-free mounts you can ever own. Our bases provide a large contact surface that ensures permanent and accurate stability for your sighting equipment. You can even detach the scope/scopemount as a unit, put it in your suitcase as you travel and remount it when in the field: your zero will still be there.

Also, you can match different ring heights and diameters with a single base, thereby being able to use different scopes while keeping your cost down. Whether you use a Sako or a Tikka, you will maximize your performance by using our own Optilock™ rings and bases.
