DREAMS OF THE OLD WEST

always conjure up images of six-shooters, lever-action rifles and celebrated buffalo guns that could shoot a mile. These days, original guns are worth thousands of dollars and most are housed in museums or private gun collections and the thought of shooting one of these treasured collector's items would set a museum curator's nerves on edge. In fact, the thrill of shooting a gun from the Old West might have been lost if it were not for gunmaker Aldo Uberti.

In 1959, Aldo Uberti founded A. Uberti, S.r.l. in the village of Gardone Val Trompia in the Italian Alps and began making replicas of Civil War era cap and ball revolvers. Over the years, as the experience and skill of his craftsmen grew, Uberti expanded into replicas of classic lever-action rifles, cowboy six-shooters and big game rifles. Not only are the Uberti guns exacting replicas down to the finest detail, but with modern machinery and materials they're actually better than the originals.

Take to the field. Competitors in the fast growing sport of Cowboy Action Shooting have been quick to recognize that Uberti guns set the standard by which others are judged. Currently the Uberti 1873 lever-action is the sport's most popular rifle and the 1873 Cattleman revolver is the hottest selling Cowboy Action handgun. However, Uberti firearms aren't just for target shooting—they were designed to take afield. Whether you target shoot or big game hunt, Uberti puts excitement and adventure back into shooting.

OUR EXCLUSIVE WARRANTY

Only those Uberti firearms imported by Stoeger Industries are protected with a 5-year warranty and serviced by factory-trained gunsmiths using genuine Uberti parts right here in the U.S.A. No other importers of Uberti products offer this extended warranty.

1847 WALKER

THE REVOLVING-CYLINDER PISTOL

1847 WALKER – 9"
ITEM # 340200 Case-hardened, walnut grip

Samuel Colt began production of a revolving-cylinder pistol on the day the Alamo fell in 1836. Produced at and named after his factory in Paterson, New Jersey, Colt's Paterson was enthusiastically received by the Rangers of the newly independent Republic of Texas. In 1844 Colt's pistol made history when sixteen Rangers held off 80 Comanche warriors with their new revolvers.

Former Texas Ranger Sam Walker had been in the Comanche fight in 1844 and became a firm believer in Colt's pistols. In 1846, war with Mexico was looming and Walker's U.S. Mounted Rifles needed a powerful handgun for mounted combat. Colt built a revolver for them that held 60 grains of black powder and chambered six, .44-caliber balls. Sam Walker ordered 1,000 of them and rode off to Mexico and into the annals of history.

The Walker's massive fire-power needed a much stronger frame and larger overall gun design than earlier models—the Walker weighed nearly 4½ pounds and was 15¾" long. The Walker's reputation assured Colt's future success.

The Walker's large capacity cylinder allows it to hold up to 60 grains of black powder and offers easy access to the percussion caps.

The Walker was one of the first revolvers fitted with a loading lever. Colt later added a loading lever latch near the muzzle.

The Walker featured a brass square-back trigger guard—an improvement over the Paterson's guardless folding trigger.

The Walker and all Dragoon models have integrated loading cut-outs for easy and secure seating of the percussion caps.

DRAGOON

BLACK POWDER EVOLVED

With an improved loading lever, shorter cylinder and lighter weight, the Dragoon was an improvement over the Colt Walker. Of the four Dragoon models, the first was manufactured for Colt by Eli Whitney. Small enhancements separate the four Dragoon models; the 1st model uses oval cylinder bolt slots, the 2nd model uses squared cylinder bolt slots, and the 3rd model incorporates a round trigger guard. The Whitneyville model is made like the original Walker, but uses a dragoon barrel and cylinder.

The Dragoon featured many design improvements over the Paterson, and included many parts identical to those used on the Walker, like the brass square-back trigger guard, making it a unique hybrid of old and new.

The Dragoons were the first Colt revolvers to feature a latch at the muzzle for the loading lever. This prevented the loading lever from falling during firing.

1848 1ST MODEL DRAGOON – 7½"
ITEM # 340800 Case-hardened, walnut grip

1848 2ND MODEL DRAGOON – 7½"
ITEM # 340810 Case-hardened, walnut grip

1848 3RD MODEL DRAGOON – 7½"
ITEM # 340860 Case-hardened, walnut grip

1848 WHITNEYVILLE DRAGOON – 7½"
ITEM # 340830 Case-hardened, walnut grip

POCKET REVOLVERS

.31-CALIBER POCKET PISTOLS

As part of its black powder firearms designed for civilians, Colt also introduced pocket revolvers, so named because they easily fit into a coat pocket. With the introduction of the 1849 Wells Fargo Pocket Revolver and 1849 Pocket .31 caliber pistols, Colt's success in the civilian market was assured.

Modern machinery and improved materials result in a stronger and more precise metal-to-metal fit on Uberti's replica firearms.

1849 WELLS FARGO – 4"
ITEM # 340380 Case-hardened, walnut grip

1849 POCKET – 4"
ITEM # 340350 Case-hardened, walnut grip

ARMY, NAVY, POCKET NAVY AND POLICE

ORIGINALLY DESIGNED BY COLT

The 1851 Navy was a scaled up, .36-caliber version of the 1849 Pocket Model. The handy, more powerful revolver immediately found a following among soldiers and civilians alike and was eventually adopted by both the U.S. and the British military. By the start of the Civil War, Colt had refined the Navy into a sleek, streamlined weapon with an improved loading lever. The 1861 Navy is often acclaimed as Colt's most handsome pistol.

Colt worked to perfect his cap and ball revolver, designing the 1860 Army around a lightweight frame, but chambered for the more powerful .44-caliber ball. The first models featured fluted cylinders, while later models incorporated a belted cylinder for added strength and a "creeping" loading lever for easier loading. The redesign of the 1860 Army Colt revolver yielded the 1862 Police single-action, with a fluted cylinder.

ARMY

1860 ARMY – 8"
ITEM # 340480 Case-hardened, walnut grip

Uberti's 1860 Army is a sleek .44 caliber revolver that is considered the ultimate combat handgun of the percussion era.

1860 ARMY FLUTED – 8"
ITEM # 340410 Case-hardened, walnut grip

The first 1860 Army Fluted featured fluted cylinders and a "creeping" loading lever for easier loading.

POCKET NAVY

1862 POCKET NAVY – 5½"
ITEM # 340760 Case-hardened, walnut grip

The 1862 Pocket Navy was up-sized to .36 caliber, but retained the octagonal barrel and traditional loading lever of earlier models.

1862 POLICE

1862 POLICE – 5½"
ITEM # 340710 Case-hardened, walnut grip

The 1862 Police revolver was designed by Colt in response to civilian demand for pocket pistols.

NAVY

1861 NAVY STEEL – 7½"
ITEM # 340500 Case-hardened, walnut grip

The 1861 Navy incorporated the "creeping" or ratchet loading lever and round barrel of the 1860 Army, but the barrel was a half an inch shorter, at 7.5 inches.

1861 NAVY CIVIL BRASS – 7½"
ITEM # 340630 Case-hardened, walnut grip

Uberti's 1861 Navy Civil Brass met a civilian demand for a medium frame, light revolver.

1851 NAVY – 7½"
ITEM # 340000 Case-hardened, walnut grip

The 1851 Navy is a scaled-up version of the 1849 Pocket Model in .36 caliber.

Left & Middle: To seat black powder loads in the cylinder of the single-action army and navy revolvers, the loading lever is freed from the latch and pulled downward. This causes the ramrod to move through the frame and ram the load home. Right: The frame cut-out in the rear of the cylinder of the 1861 Navy allows easy access to the nipples for seating percussion caps.

NEW ARMY AND TARGET CARBINE

.44 CALIBER BLACK POWDER REVOLVERS

1858 NEW ARMY

1858 NEW ARMY – 8"
ITEM # 341000 Blued, walnut grip,
octagonal barrel

Uberti's 1858 New Army is a large-frame .44 caliber, which features a brass trigger guard, solid frame and two-piece grip.

1858 NEW ARMY STAINLESS STEEL – 8"
ITEM # 341020 Stainless steel, walnut grip,
octagonal barrel

Uberti's New Army Stainless Steel features an octagonal barrel with a dove-tailed front sight and loading lever latch.

The Remington Arms Company began production of 1858 New Army single-action revolvers and five years later this revolver had gained a foothold. In 1863, an improved version of the rugged .44 caliber, also known as the Remington-Beals revolver, was purchased by the U.S. Army.

In the years following the Civil War, the black powder firearms maker also manufactured a carbine version of the 1858 New Army, the 1858 Target Carbine, in smaller numbers.

The Remington 1858 New Army Conversion was among the first of the Civil War era percussion revolvers converted to fire metallic cartridges. The original cap-and-ball cylinder was altered or replaced by a cartridge cylinder and a new breech face with a loading gate was added. In addition, the frames were dovetailed to permit the insertion of an ejector assembly. The earliest model, introduced by Remington in 1868, chambered five .46-caliber rimfire cartridges. Later, six-shot versions were chambered for .44-caliber centerfire rounds. These conversions were the predecessors of the 1858 New Army cartridge revolver.

1858 TARGET CARBINE

1858 TARGET CARBINE – 18"
ITEM # 341200 Blued, walnut stock, octagonal barrel

In the years following the Civil War a small number of Carbine versions of the 1858 New Army were manufactured by Remington.

NEW ARMY CONVERSION

1858 NEW ARMY CONVERSION – 8"
ITEM # 341001 Blued, walnut grip,
octagonal barrel

The 1858 New Army was among the first of the Civil War era percussion revolvers converted to fire metallic cartridges.

The 1858 New Army is offered with a stainless steel frame, cylinder, barrel, hammer and backstrap.

The 1858 New Army is fitted with a brass trigger guard on both the stainless and blued models.

All of Uberti's revolver cylinders are machined so that the nipple recesses and cylinder notches are cut cleanly and precise.

The 1858 New Army features an octagonal barrel with a dove-tailed front sight and loading lever latch.

ARMY CONVERSION, NAVY CONVERSION AND OPEN-TOP

SINGLE-ACTION CARTRIDGE REVOLVERS

ARMY CONVERSION

1860 ARMY CONVERSION – 5½"
ITEM # 341362 Case-hardened, walnut grip,
round barrel

Colt introduced the Richards-Mason conversion, which involved installing a conversion ring for accepting metallic cartridges.

In 1872, Colt entered the market for metallic cartridge revolvers by introducing their factory-installed percussion-to-cartridge open-top conversion of the 1851 Navy cap-and-ball revolver, followed quickly by the Richards-Mason conversion of the 1860 Army the following year. Based on a patent held by Colt employees Charles Richards and William Mason, the old cap and ball cylinders were cut down at the back, to allow the installation of a conversion ring to accept metallic cartridges.

In addition to civilian orders, Colt received an Army contract in 1871 to convert 1,000 Model 1860 Army percussion revolvers to use the .44-caliber centerfire cartridge being manufactured at the Frankford Arsenal. Eventually, a total of 9,000 Open Tops and 2,100 Richards-Mason conversions were produced. Ultimately, thousands of the Colt and Remington converted percussion revolvers found their way into the hands of sheriffs, outlaws, gunfighters, soldiers, cowboys, miners and ranchers throughout the Old West.

The 1860 Army Conversion revolver frames had to be fitted with spacers in order to function properly and safely with the shortened cartridge conversion cylinders.

The frames on Uberti's conversion revolvers are retro-fitted with loading gates to accommodate cartridges, exactly like the originals.

The conversion revolvers were also fitted with ejector rods, a necessity for removing fired casings from the cylinder.

NAVY CONVERSION

1851 NAVY CONVERSION – 7½"
ITEM # 341360 Case-hardened, walnut grip,
octagonal barrel

Original cap-and-ball cylinders were altered or replaced by a cartridge cylinder and a new breech face with a loading gate was added.

OPEN-TOP

1871 EARLY MODEL OPEN-TOP – 5½"
ITEM # 341353 Case-hardened, walnut grip,
round barrel

In 1872, Colt introduced their factory-installed percussion-to-cartridge conversion of the 1851 Navy cap-and-ball.

1872 LATE MODEL OPEN-TOP – 7½"
ITEM # 341351 Case-hardened, walnut grip,
round barrel

Converted frames were also dove-tailed to permit the fitting of an ejector assembly.

1873 SINGLE-ACTION CATTLEMAN

THE GUN THAT WON THE WEST

Not long ago, an employee at Colt was looking through old invoice files and found a special order for a Colt .45 “Peacemaker” with 4” barrel, nickel finish and ivory grips. The request was penned on stationery from the Long Branch Saloon in Dodge City, Kansas and the order was from lawman Bat Masterson. Uberti has recreated some of the special-order six-shooters that would have been right at home on the dangerous streets of Dodge City.

Two favorite special orders in the Old West were for ivory grips and a nickel finish. The 1873 Cattleman Cody recreates that classic version and the “Frisco” celebrates the popularity of mother-of-pearl grips and custom metal finishes.

1873 DESPERADO – 5 1/2"
ITEM # 356031
Nickel, bison horn-style grip

Uberti's Desperado is nickel-plated and features a bison horn-style grip with either a 4¾" or 5½" barrel.

1873 CATTLEMAN NICKEL – 7 1/2"
ITEM # 344151 Nickel, walnut grip

Nickel-plated versions of the single-action Army revolvers were issued to Indian scouts because of durability and weather resistance.

1873 CODY – 5 1/2"
ITEM # 356005
Nickel, ivory-style grip

Two favorite special order items in the Old West were for ivory grips and a nickel finish—Uberti's Cody recreates that classic version.

1873 CATTLEMAN MATCHING SETS

SINGLE-ACTION ARMY REVOLVERS

1873 CATTLEMAN STAINLESS – 7 1/2"
ITEM # 345029 Stainless steel, walnut grip

Uberti's Cattleman Stainless is a durable material that is also weather resistant and holds up well to holster wear.

1873 CATTLEMAN MATCHING SETS – .45 COLT"
ITEM # 356050 and 356051
Nickel, ivory-style grip; 5½" barrel shown

1873 SINGLE-ACTION CATTLEMAN

ENGRAVED SINGLE-ACTION ARMY REVOLVERS

1873 ENGRAVED – 5 1/2"
ITEM # 356077 Stainless Steel, pearl-style grip, full scroll-engraving

Uberti's Engraved Cattleman features full scroll-engraving, pearl-style grips and comes with either a 4¾" or 5½" barrel.

These six-shooter Colt revolvers are offered in stainless steel with a one-piece, pearl-style grips.

1873 CATTLEMAN MATCHING SETS – .45 COLT"
ITEM # 344120 and 344121
Color case-hardened; A-grade walnut; 5½" barrel shown

1873 SINGLE-ACTION CATTLEMAN

THE PEACEMAKER

“God made men, but Sam Colt made them equal,” was a piece of frontier wisdom based on the formidable Colt .45 — the “Peacemaker.” In 1873, Colt’s Single-Action Army (SAA) revolver became the Army’s standard sidearm. Cavalry troopers were armed with the new revolvers, lawmen and outlaws alike were quick to adopt the handy new six-shooter. The Colt Single-Action came in many variations and Uberti has recreated the most popular models in the 1873 Cattleman series.

While the single-action Army was most widely produced with a color case-hardened frame and blued barrel, a nickel-plated version was issued to Indian scouts. A bright “charcoal blue” finish was available from the factory, but with years of use the old six-guns took on a well-handled soft gray patina. All of these classic finishes are available in the 1873 Cattleman.

1873 SINGLE-ACTION CATTLEMAN NEW MODEL (NM) VS. OLD MODEL (OM) WHAT'S THE DIFFERENCE?

The New Model (NM) Cattleman features a slightly higher fixed front sight and an oblong ejector-plunger grip, while the Old Model (OM) features a shorter front sight and a round ejector-plunger grip.

Uberti offers a variety of 1873 Cattleman Single-Action revolvers in .45 Colt, .357 Magnum, .44-40 and .44 Magnum. Many finishes can be had in either the “Old Model” (OM) with a screw cylinder-pin retainer (above left) or the “New Model” (NM) with a spring-loaded cylinder-pin retainer (above right).

1873 CALLAHAN — 6"
ITEM # 349221 Standard blue, walnut grip

Uberti's Cattleman Callahan is a large-frame, blued SAA in .44 Magnum and is offered in 4 ¾" and 6" barrels with fixed sights.

1873 CALLAHAN TARGET — 6"
ITEM # 349224 Standard blue, walnut grip

Uberti's Cattleman Callahan Target is a blued .44 Magnum that comes in 6" and 7 ½" barrels with adjustable sights.

The New Model (NM) Cattleman features an improved cylinder-pin retainer, which is spring-loaded making it easier to release and remove the cylinder-pin.

Uberti's Cattleman series of single-action revolvers utilize a six-shot cylinder, which is loaded by bringing the hammer back to the half cock and swinging the loading gate downward to allow access to the cylinder chambers.

**1873 CATTLEMAN
CHARCOAL BLUE — 4 ¾"**
ITEM # 345122 Charcoal blue, walnut grip

Uberti utilizes charcoal bluing to create a distinctive, rich blue color on the barrel, cylinder, trigger guard and backstrap.

1873 FRISCO — 5 ½"
ITEM # 356008
Charcoal blue, pearl-style grip

Uberti's Frisco celebrates the popularity of mother-of-pearl-style grips and custom metal finishes.

1873 CHISHOLM — 4 ¾"
ITEM # 356033
Matte blue, checkered walnut grip

Uberti's Chisholm is offered in two barrel lengths and features matte blueing and checkered walnut grips.

1873 OLD WEST — 5 ½"
ITEM # 355130 Old West finish, walnut grip

Uberti's Cattleman Old West comes with walnut grips and a finish that gives the appearance of a well-worn “Peacemaker.”

1873 CATTLEMAN BRASS — 5 ½"
ITEM # 344510
Case-hardened, walnut grip

Uberti's Cattleman Brass, featuring a brass trigger guard and backstrap, comes in several calibers, including .45 Colt, .44-40 and .357 Magnum.

1873 HOMBRE — 4 ¾"
ITEM # 343990 Matte blue, walnut grip

Uberti's Hombre, featuring matte-finish blue steel and brass trigger guard and backstrap, comes in either .45 Colt or .357 Magnum.

1873 CATTLEMAN STEEL — 4 ¾"
ITEM # 344100 Case-hardened, walnut grip

The original Single-Action Army Colt pistol was first introduced in 1873 and quickly became the Army's standard sidearm.

STALLION, BISLEY & CATTLEMAN BIRD'S HEAD

VARIETY OF SAA MODELS

The Colt 1873 Single-Action Army revolver was arguably the best-selling revolver ever produced. Colt Single-Actions were manufactured in numerous calibers, including .22 LR. The Colt Single-Action in .22 caliber was very popular due to the cheap price of ammunition and light recoil in a full-sized revolver. The Stallion, which is a scaled down version of the Colt Single-Action Army, is available in both .22 LR and .38 Special.

Originally designed as a target revolver, the Bisley featured a longer grip frame for its target grips and a wide target hammer with a lower profile. Over 40,000 Colt Bisleys were made between 1894 and 1915.

A “Birds Head” grip was not a new design; it had been used on Colt derringers since the 1850s. In 1877, Colt introduced full-sized six-guns called the “Lightning” and “Thunderer.” The Old West cowboys, however, just called them “Bird’s Head Colts.”

1873 STALLION

SINGLE-ACTION IN .22 LR

1873 STALLION STEEL TARGET – 5 1/2"
ITEM # 349890 Case-hardened, walnut grip

Uberti's 1873 Stallion Steel Target is a scaled-down single-action that comes with adjustable sights. Some models are available with both .22 LR and .22 Magnum cylinders.

STALLION 10-SHOT – 5 1/2"
ITEM # 349883 Case-hardened, walnut grip

Uberti's Stallion 10-Shot is a scaled-down .22 LR that comes with fixed- or adjustable-sights and a brass backstrap and trigger guard.

1873 STALLION BRASS – 5 1/2"
ITEM # 349879 Case-hardened, walnut grip

Uberti's Stallion Brass is a scaled-down six-shot with fixed sights and available in .22 LR/Mag. or .38 Spl.

All Uberti 1873's are easily field stripped for cleaning and maintenance purposes.

1873 BISLEY

SAA TARGET REVOLVERS

1873 BISLEY – 7 1/2"
ITEM # 346140 Case-hardened, walnut grip

The Colt Bisley was originally designed as a target revolver to compete at the British Commonwealth Championship Match in Bisley, England in 1894.

The Bisley was designed as a target revolver and features a longer grip frame and a wide, lower profile, target hammer.

The Bird's Head model has a grip design that was originally used on Colt Derringers back in the 1850s.

1873 CATTLEMAN BIRD'S HEAD

NEW SAA GRIP DESIGN

1873 CATTLEMAN BIRD'S HEAD – 4 3/4"
ITEM # 344840 Case-hardened, walnut grip

The “Birds Head” is named for the distinctive shape of the popular grip, which fits a standard size 1873 frame and cylinder.

1873 CATTLEMAN BIRD'S HEAD – 4"
ITEM # 344880 Case-hardened, walnut grip

1873 CATTLEMAN BIRD'S HEAD STALLION OLD WEST DEFENSE – 3 1/2"
ITEM # 349891 Case-hardened, checkered walnut grip

1873 CATTLEMAN BIRD'S HEAD – 3 1/2"
ITEM # 344690 Case-hardened, walnut grip

1873 REVOLVER CARBINE & BUNTLINE

LONG-BARREL SAA REVOLVERS

1873 REVOLVER CARBINE – 18"
ITEM # 344190 Case-hardened, walnut stock

Revolving rifles and carbines, like the Uberti 1873 Revolver Carbine and the 1873 Buntline Target, were among the first effective repeating rifles. Colt model repeating rifles were carried in the Mexican War and the Apache Wars of the Old Southwest.

1873 BUNTLINE TARGET – 18"
ITEM # 345160 Case-hardened, walnut grip

Many manufacturers offered special-order carbine versions of their popular single-action revolvers, despite the popularity of the new lever-action rifles. The Uberti 1873 Revolver Carbine is available in .45 caliber with an 18" barrel, with traditional field sights or adjustable target sights.

The Colt Buntline 1873 Single-Action target revolver has become one of the icons of the Old West. Tradition has it that dime novelist Ned Buntline presented special-order 1873 Colt revolvers with extra-long barrels, target sights, and detachable wire shoulder stocks to a select group of Old West celebrities including, Wyatt Earp and Bat Masterson. Based on this story, the long-barreled Peacemakers came to be called Buntline Specials. Only 31 of the originals were ever produced, and only 18 of those are around today. The Uberti 1873 Buntline Target, however, is available at your local dealer.

Left & Middle: The Uberti 1873 Buntline Target Single-Action revolver sports an 18" barrel and comes with an angled front target sight and an adjustable, notched rear blade sight. **Right:** The Uberti 1873 Revolver Carbine is also available with fixed sights.

1873 EL PATRÓN

FACTORY CUSTOM-TUNED SAA

You can depend on it! Lightning fast and reliable, shot-after-shot—in the world of single-action revolvers Uberti's hand-tuned Cattleman model is truly "the boss," or El Patrón, as the Vaqueros of the Old West would say. The gunsmiths at Uberti have fitted each El Patrón with high-grade, US-manufactured Wolff® springs and each revolver has been carefully tested and certified for fit and function. The result is a single-action that is reliable, light and fast with a smooth-tuned action. The El Patrón is available in six factory custom-tuned models with color case-hardened or stainless steel frames, numbered

cylinders, steel backstraps and trigger guards, checkered walnut grips and wide, easy-view front and rear sights.

Uberti is also offering an 1873 Cattleman El Patrón Cowboy Mounted Shooter (CMS) in a customized, full-size single-action revolver that's designed to make mounted shooting easier. A shorter barrel is better suited for quick draw and the lower hammer profile, makes it easier to cock and shoot the El Patrón CMS using only one hand while mounted on horseback. The El Patrón is available in traditional .45 Colt or the powerhouse .357 Magnum.

1873 EL PATRÓN COMPETITION – 5 1/2"
ITEM # 345078
Color case-hardened, checkered walnut grip

Uberti's 1873 El Patrón Competition is also available in stainless with a lower hammer angle and 4 3/4-in barrel.

1873 EL PATRÓN COMPETITION – 4 3/4"
ITEM # 345082
Stainless, checkered walnut grip

Uberti's El Patrón Competition features a hammer with a lower angle for easier access and quicker shooting.

The competition hammer offered on both the Competition and CMS models, makes it easier to cock and faster for one-handed shooting while on horseback.

1873 EL PATRÓN – 5 1/2"
ITEM # 345075
Case-hardened, checkered walnut grip

Uberti fits each El Patrón with high-grade, US-manufactured Wolff® springs, and each revolver has been carefully tested and certified.

1873 EL PATRÓN – 4 3/4"
ITEM # 345076
Stainless, checkered walnut grip

Uberti's El Patrón is a factory-custom single-action revolver that is reliable and faster with a smooth-tuned action.

1873 EL PATRÓN CMS – 3 1/2"
ITEM # 349892
Case-hardened, checkered walnut grip

Uberti's El Patrón CMS features a tuned action, shorter barrel, wider trigger and a lower, wider hammer for easier one-handed cocking.

1873 CATTLEMAN .22 LR

FULL-FRAME SAA IN .22 LR

1873 CATTLEMAN .22 LR
6-SHOT — 5 1/2"
ITEM # 356084 Case-hardened, brass backstrap and trigger guard, walnut grip

1873 CATTLEMAN .22 LR
12-SHOT — 5 1/2"
ITEM # 356087 Case-hardened, steel backstrap and trigger guard, walnut grip

1873 HORSEMAN

TRANSFER-BAR REVOLVER

1873 HORSEMAN — 5 1/2"
ITEM # 356091 Case-hardened, blued backstrap and trigger guard, walnut grip

Uberti's Horseman are 1873 Colt replicas that incorporate a modern transfer-bar safety system.

Uberti's new Horseman series has the fit, feel and finish of the original Old West models, with improvements to make the revolver stronger and easier to handle. Besides the inclusion of the modern transfer-bar system, this upgraded replica features a coil main spring and a wider trigger and smoother, crisper trigger pull. These modern advances make the Horseman a gun the cowboys of yesteryear would love to have had.

Cowboy-action and target shooters alike will find Uberti's two new 1873 Cattleman chambered in .22 LR ideal for target practice, due to the economical cost of ammo and the lower recoil of the .22 LR caliber round.

Available in two configurations, both with color case-hardened frames and fixed sights, these replicas are available in 4 3/4", 5 1/2" and 7 1/2-inch barrels with one-piece oil finished walnut grips.

The 1873 Horseman's coil mainspring is an improvement over a flat-spring which is more prone to breakage and wear.

Uberti's modern transfer-bar safety system prevents the hammer from contacting the firing pin before the trigger is pulled.

OUTLAW, FRONTIER & POLICE

ORIGINAL REMINGTON DESIGNS

Remington entered the cartridge revolver market in 1875 when it introduced a big-frame, Army-style revolver—a six-shooter—to compete with the Colt Peacemaker. The 1875 Remington Single-Actions kept the solid frame and overall styling of Remington's 1858 percussion models. Ordinary citizens and Old West lawmen alike recognized the sturdy quality of the new Remington revolvers. The infamous Frank James even carried one for most of his outlaw career. Faithful reproductions, the Uberti 1875 Army Outlaw and 1875 Frontier are available in Frank's favorite caliber, .45 Colt.

The 1875 Army Outlaw embodies the overall styling of the original Remington 1858 percussion revolver complete with bottom blade, known as a "sail".

1875 ARMY OUTLAW & FRONTIER

SOLID-FRAME 1875 SINGLE-ACTION REVOLVERS

1875 ARMY OUTLAW — 7 1/2"
ITEM # 341515 Nickel, walnut grip

Uberti's 1875 Army Outlaw retains the solid frame and overall styling of the 1858 percussion model.

1875 ARMY OUTLAW — 7 1/2"
ITEM # 341510 Case-hardened, walnut grip

In 1875 Remington entered the cartridge revolver market, introducing a six-gun to compete with Colt's popular "Peacemaker."

1875 FRONTIER — 5 1/2"
ITEM # 341660 Case-hardened, walnut grip

Uberti's 1875 Frontier is like the original which was a favorite of outlaw, Frank James, who carried one for most of his career.

1890 POLICE

PRIZED COLLECTIBLE IN .45 AND .357

1890 POLICE — 5 1/2"
ITEM # 356010 Blued, walnut grip

Uberti's 1890 Police was mainly used by police on Indian reservations, which accounts for their scarcity on the collector's market.

The 1890 Police, styled similar to the Colt by eliminating the bottom blade, was Remington's Single-Action offering.

The 1890 Police is chambered in .357 Magnum and .45 Colt and like the original, it comes complete with a lanyard ring.

TOP BREAK

EFFICIENT LOADING DESIGN

NO. 3 – NEW MODEL RUSSIAN – 6½"
ITEM # 348579 Blued, walnut grip

NO. 3 – 2ND MODEL – 5"
ITEM # 348577 Blued, walnut grip

NO. 3 – 2ND MODEL – 3½"
ITEM # 348530 Blued, walnut grip

Designed by Major George Schofield as a cavalry pistol, the efficient break-open design could be operated one-handed, ejecting all six spent cartridges and providing easy access for reloading while on horseback.

While the U.S. Cavalry was slow to see its merits, others such as Jessie James, John Wesley Harden and Wild Bill Hickok saw the Top Break's fast reloading capability as a distinct advantage in their line of work.

After numerous trials, the U.S. Army finally purchased 3,000 Top Breaks with an improved top latch, but it was the Russian government that ultimately embraced the new sidearm. With a modified grip design, lanyard ring and the addition of a distinctive trigger guard spur, the Czar ordered 41,000 of the new revolvers.

True to the originals, Uberti Top Breaks come in three models including the Russian Model with Cyrillic barrel stampings. Chamberings include .38 Special, .45 Colt and of course the old tried and true .44-40. The New Model Russian is chambered in .45 Colt and .44 Russian.

NO. 3 – 2ND MODEL – 7"
ITEM # 348572 Nickel, pearl-style grip

NO. 3 – 2ND MODEL – 7"
ITEM # 348578 Blued, walnut grip

The sturdy, stirrup-style top latch on the 2nd Model revolver ensures a firm lock for the Top Break design.

The Top Break features an automatic cartridge extractor.

1860 HENRY

BRASS-FRAME LEVER-ACTION REPEATING RIFLE

1860 HENRY RIFLE STEEL – 24¼"
ITEM # 342370 Case-hardened, A-Grade walnut

1860 HENRY TRAPPER – 18½"
ITEM # 342910 Brass, A-Grade walnut

1860 HENRY RIFLE – 24¼"
ITEM # 342390 Brass, A-Grade walnut

Uberti's 1860 Henry is true to the original by featuring a lever lock located at the rear of the lever, and a convenient external cartridge follower, which aids in loading the tubular magazine.

Uberti's 1860 Henry Rifle sports a distinctive solid brass receiver and was originally issued to 1,700 Union troops after the Civil War began. Originally, Henrys were bronze-framed and rugged iron-framed models.

B. Tyler Henry of the New Haven Arms Company introduced the Henry rifle the year the Civil War began. Only 1,700 of the lever-action repeating rifles were issued to Union troops, but the gun's reputation quickly grew. Southerners dubbed it "that tarnation Yankee rifle that they load on Sunday and shoot all week."

After the war, the Henry went West. There was more than one of the Henry rifles in the fight at Little Big Horn. Unfortunately for Custer, all of the Henrys were used by Indians.

Uberti offers two brass-framed and one steel-framed Henry. All models are chambered in .44-40 and .45 Colt.

1866 YELLOWBOY

COMBINING BEAUTY AND FUNCTIONALITY

The 1866 Yellowboy was a marked improvement over the old Henry. Winchester's plant superintendent, Nelson King, devised a convenient loading gate that passed cartridges through the side of the receiver. This not only made the new rifle more functional, but also allowed for the installation of a wooden forend. The handy carbine version of the 1866 Yellowboy was the first true cowboy lever-action rifle and was the first rifle widely carried in a cowboy-style saddle scabbard.

The new 1866 Yellowboy was a hit worldwide. Chief Sitting Bull had an 1866, Benito Juarez's forces used Yellowboys in Mexico and the Turkish army used the new Winchester against the Russians. Uberti has recreated three of the most popular models: the Yellowboy Carbine with a 19" barrel and carbine style brass buttplate. The Yellowboy Rifle with 24¼" barrel and Short Rifle with 20" barrel, both with a brass forend nose cap and a solid brass crescent buttplate.

1866 "YELLOWBOY" RIFLE — 24¼"
ITEM # 342290 Brass, A-Grade walnut, octagonal barrel

1866 "YELLOWBOY" SHORT RIFLE — 20"
ITEM # 342340 Brass, A-Grade walnut, octagonal barrel

1866 "YELLOWBOY" CARBINE — 19"
ITEM # 342280 Brass, A-Grade walnut, round barrel

Another improvement is the addition of a satin walnut forend, which is embellished with a brass forend nose cap.

Uberti's 1860 Yellowboy sports a distinctive solid brass receiver.

Uberti's 1866 Yellowboy lever-action rifle features a side loading gate—one of the major improvements over the 1860 Henry.

1871 ROLLING BLOCK

HUNTER CARBINE

1871 ROLLING BLOCK HUNTER CARBINE — RIMFIRE — 22"
ITEM # 341400 Case-hardened, A-Grade walnut
(centerfire carbines — blue frame)

The original rolling block, designed in 1867 by Remington, is a strong, simple action, not prone to jamming by dirt or rough usage.

The rolling block design is one of the simplest actions ever produced. Using modern metals and more precise manufacturing methods, Uberti is able to produce a rifle that's one-third of the original gun's size and weight, yet retains all the strength for use with today's modern ammo.

1873 RIFLE AND CARBINE

THE RIFLE THAT WON THE WEST

1873 SPECIAL SPORTING RIFLE — 24¼"
ITEM # 342770 Case-hardened,
A-Grade walnut, octagonal barrel

Winchester's 1873 rifle was the "Rifle that Won the West." It was chambered in a new, more powerful cartridge, the .44-40 — a .44 caliber bullet, propelled by 40 grains of black powder. However, a factor that really insured the success of the 1873 Winchester rifles was that Colt quickly offered its Peacemaker chambered in .44-40, as well. A cowboy could have both a lever-action rifle and his six-shooter, and needed only one cartridge belt for both.

Like the 1860 Henry, the 1873 lever rifle also included a lever lock to ensure the lever remained securely in place.

Most Texas Rangers, and every Old West cowboy worth his salt, carried 1873 rifles. Chappo, the son of Apache war chief Geronimo, packed an 1873. And Buffalo Bill carried an 1873 lever-action rifle along with a pair of .44-40 Colts in 1876 when he worked as an Army scout. This piece of rifle history is available in seven distinctive models of Uberti rifles, including the Uberti 1873 Carbine, and Uberti 1873 Special Sporting Rifle.

1873 CARBINE — 19"
ITEM # 342800 Blued, A-Grade walnut, round barrel

1873 SHORT RIFLE — 20"
ITEM # 342810 Case-hardened, A-Grade walnut, octagonal barrel

1873 SPORTING RIFLE — 24¼"
ITEM # 342820 Case-hardened, A-Grade walnut, octagonal barrel

1873 CARBINE — 19" 44 MAG.
ITEM # 341260 Blued, A-Grade walnut, round barrel

1873 HALF OCTAGONAL BARREL RIFLE — 18"
ITEM # 342440 Case-hardened, A-Grade walnut

1873 TRAPPER RIFLE — 16½"
ITEM # 342430 Blued, A-Grade walnut, round barrel

Chambered for the then new .44-40 cartridge, the 1873 lever rifle featured a side-loading gate for easy loading of its tubular magazine.

1874 SHARPS

THE ORIGINAL BUFFALO GUN

SHARPS EXTRA DELUXE – 32"
ITEM # 71100 AAA-Grade satin walnut, octagonal barrel

Uberti's Sharps Extra Deluxe features intricate engraving and the finest select AAA-Grade satin walnut stock and forend.

Christian Sharps' original design, patented in 1848, was loaded with a linen cartridge and percussion primer. The sturdy action was faster and easier to load than a conventional muzzleloader and the first military order for 900 Sharps rifles came from the U.S. Navy in 1859. That same year John Brown's raiders carried Sharps carbines at Harper's Ferry. When the Civil War began, orders flowed in for carbine versions for issue to the cavalry.

Previously offered only through select World Class Collection™ dealers, Uberti currently offers the hand-engraved, Extra-Deluxe version of the Sharps with elegant gold inlays and select AAA-Grade walnut stocks.

Continued on page 30

DELUXE SHARPS – 34"
ITEM # 71002 Case-hardened, AA-Grade walnut, octagonal barrel

Uberti's Deluxe Sharps features an AA-Grade checkered walnut stock and forend and comes with a Creedmoor tang sight.

"DOWN UNDER" SHARPS – 34"
ITEM # 71003 Case-hardened, A-Grade walnut, octagonal barrel

Uberti's "Down Under" Sharps is a reproduction of the Sharps that Tom Selleck carried and with which he made some amazing long-distance shots in the film, *Quigley Down Under*.

Uberti's 1874 Extra Deluxe and Deluxe Sharps feature barrels with a dovetailed front globe sight to be used in conjunction with a rear tang-mounted Creedmoor sight.

The receiver on Uberti's 1874 Deluxe Sharps, single-shot .45-70 rifle is color case-hardened and embellished with a gold-inlaid bison head.

Intricate engraving adorns the Uberti Sharps Extra Deluxe rifle, which includes a beautifully detailed side-view of an engraved and gold-inlaid bison and a bison's head.

1874 SHARPS

THE ORIGINAL BUFFALO GUN

SPECIAL SHARPS – 32"

ITEM # 71001 Case-hardened, A-Grade walnut, pewter forend cap, octagonal barrel

Uberti's Special Sharps features a 32" octagonal barrel, pewter forend cap and double set-triggers to aid in the accuracy of long-distance shots.

Continued from page 28

After the war Sharps rifles, adapted to fire metallic cartridges, were used by the American Rifle Team to win the first international long-range rifle match at Creedmoor, New York. By the late 1870s and early 1880s, the long-range models became the favorites of professional buffalo hunters. These heavy barreled Sharps could be employed at long range to take selected buffalo without spooking the herd.

In 1874, more than 700 Comanche warriors attacked 30 buffalo hunters at Adobe Walls in the Texas panhandle. By the second day, the hunters' Sharps rifles had extracted a punishing toll and the only Indians in sight were a small group on a distant bluff. Hunter Billy Dixon took aim with his Sharps and rolled one of the braves from his saddle at, what legend has it, was a mile away. Chambered in classic .45-70, the Uberti Sharps is true to the original. Six models are available ranging from the "Long-Range Model," with 34" half-octagon barrel, Creedmoor sight and double set-triggers, to the Sharps Cavalry Carbine.

The top tang on the Sharps receiver is drilled and tapped to accommodate the attachment of a Creedmoor rear sight.

All models of Uberti's 1874 Sharps rifles, excluding the Cavalry Carbine, feature double set-triggers, allowing the front trigger to be set to a very light pull-weight—an aid to accurate shooting.

The Creedmoor tang sights used on Sharps rifles were of three heights, depending on the yardage. The lowest, short-range sight was good to 300 yards, mid-range to about 600 yards and the long-range, to 1,200 yards and beyond.

BUFFALO HUNTER SHARPS – 32"

ITEM # 71005 Case-hardened, A-Grade walnut, octagonal barrel

By the late 1870s, the Sharps long-range models became favorites of professional buffalo hunters. Heavy-barrel Sharps were used to take selected buffalo without spooking the herd.

CAVALRY CARBINE SHARPS – 22"

ITEM # 71010 Case-hardened, A-Grade walnut, round barrel

When the Civil War began, orders flowed in for short-barrel carbine versions of the Sharps for issue to the cavalry.

1876 CENTENNIAL RIFLE

LEVER-ACTION IN HARD-HITTING CALIBERS

In 1876 Winchester introduced a new lever-action rifle. The Winchester 1876 rifle was called the Centennial Rifle, in commemoration of the one hundredth anniversary of the United States. Favored by the likes of Theodore Roosevelt, the 1876 Centennial Rifle was the king of its day. It was discontinued in 1898, after 63,871 of the Winchester lever-action rifles had been produced.

Now, 137 years after the first 1876 rifle was produced by Winchester, Uberti has brought this legend back to life, even better than before. Uberti's 1876 Centennial Rifle is an exact replica of the Winchester Centennial Rifle, with better, stronger

materials and more precise machining to exacting tolerances and specifications. Today's model is stronger and more accurate with modern smokeless and black powder ammunition. True to the original Winchester rifles, the Uberti 1876 Centennial Rifle is chambered in the hard-hitting calibers: .45-60, .45-75, and .50-95. These Uberti rifles are strong enough to take down North America's largest big-game animals. The 1876 rifle comes with a 28" octagonal barrel, fully-adjustable sights, color case-hardened receiver, and A-Grade walnut straight stock and forend.

1876 CENTENNIAL RIFLE - 28"
ITEM # 342500 Case-hardened, A-Grade walnut, straight stock, octagonal barrel

The 1876 rifle includes a lever lock to ensure the lever remains securely in place.

The 28" barrel sports a Buckhorn adjustable rear sight and a blade front sight.

The 1876 rifle features a side-loading gate for easy loading of its tubular magazine.

SILVERBOY LEVER-ACTION

"OLD WEST" SMALL-BORE LEVER GUN

The Silverboy is the ultimate small-bore, lever-action rifle chambered in .22 LR or .22 Magnum. This is an all-original lever-action firearm, based on the classic styling of the Old West lever-gun. The Silverboy embodies the best features of the proven lever-gun design that goes back as far as the mid-1800s.

A cartridge-control mechanism allows controlled-round-feed so that the gun can be fired reliably while held at any angle.

SILVERBOY LEVER-ACTION RIFLE .22 LR - 19"
ITEM # 342350 Chrome-plated alloy receiver, walnut straight stock

SILVERBOY LEVER-ACTION RIFLE .22 MAG - 19"
ITEM # 342351 Chrome-plated alloy receiver, walnut straight stock (not pictured)

1883 LEVER-ACTION

RIFLE AND CARBINE

Made from 1883 to 1885, the Burgess Lever-gun was Colt's answer to Winchester's popular lever-action rifle. But the threat of such a formidable competitor literally set Winchester back on its heels. To respond, Winchester began gearing up to make pistols. That's when high-level politicians stepped in to put pressure on both companies to avoid disaster. Folklore has it, that this was one of the first big-level "back room" deals ever made between two large gun companies. By the time an agreement was reached Colt had produced 6,400 Burgess lever actions.

1883 LEVER-ACTION RIFLE - 25 1/2"
ITEM # 342455 Blued, A-Grade walnut, round barrel

1883 LEVER-ACTION CARBINE - 20"
ITEM # 342450 Blued, A-Grade walnut, round barrel

SPRINGFIELD TRAPDOOR

U.S. ARMY'S FIRST OFFICIAL CARTRIDGE RIFLE

In 1873 the Army's Allin Trapdoor rifle was redesigned for the new more powerful .45-70 military cartridge and both full-stocked 32" barreled rifles and half-stocked, short-barreled carbines were produced for the military. It was with their new 1873 Trapdoor Carbines that Custer and the 7th Cavalry rode off to the Little Big Horn and into the pages of history. The Trapdoor was also very popular with many famous Indian warriors. Sitting Bull was

carrying a Trapdoor Carbine that was probably picked up at the Little Big Horn when he surrendered to American troops. Geronimo was also carrying his faithful Trapdoor Carbine when he turned over his arms to General Miles in 1886. Along with seeing service on both sides during the Indian Wars in the American West, the Trapdoor was used widely by American Troops during the Spanish American War, both in Cuba and the Philippines.

SPRINGFIELD TRAPDOOR ARMY RIFLE - 32 1/2"
ITEM # 71007 Blued receiver and barrel, case-hardened breechblock and buttplate

SPRINGFIELD TRAPDOOR CARBINE - 22"
ITEM # 71008 Blued receiver and barrel, case-hardened breechblock and buttplate

This top view of the Springfield Trapdoor's receiver shows the hinged and arched breechblock pivoted forward for loading.

The Springfield Trapdoor Carbine is fitted with a sliding ring and bar, which allowed a cavalryman to carry it clipped to his carbine sling.

LIGHTNING

SLIDE-ACTION REPEATER

The Colt Lightning rifle, introduced in 1884, was chambered in .44-40, the most popular pistol round offered for Colt's 1873 single-action revolvers. Colt followed with Lightnings in three different frame sizes to accommodate a wide range of cartridges from .22 caliber up to .50-95 Express. More than 185,000 Lightning Rifles were manufactured, but there hasn't been a new one made since 1904 — that is until now.

The Lightning Rifle by Uberti is an exact replica of the original Colt Lightning, but by using modern steel and manufacturing techniques, the Uberti Lightning will safely stand up to modern ammunition. The Lightning Rifle is available in .45 Colt or .357 Magnum, all with luster-finished satin walnut stocks and a choice of blued or color case-hardened receivers. When it comes to speed it can still beat any Winchester — or, as Sam Colt used to put it, "nothing is faster than Lightning."

LIGHTNING RIFLE - 24 1/4"
ITEM # 356028 Case-hardened, A-Grade walnut, octagonal barrel

LIGHTNING SHORT RIFLE - 20"
ITEM # 356026 Case-hardened, A-Grade walnut, octagonal barrel

Like many lever-action rifles, the Lightning's color case-hardened receiver features top ejection and a side-loading gate for easy access to the tubular magazine.

The Lightning's short, hand-conforming forend features cut-checkering for a positive gripping surface during speed cycling.

The Lightning's full-length tubular magazine reaches to the muzzle of the octagonal barrel. A front blade sight is dovetailed into the top of the muzzle.

1885 HIGH-WALL

LONG-RANGE TARGET RIFLE

John Browning designed High-Wall, Single-Shot rifles for Winchester at the end of the buffalo hunting era. These accurate Winchester rifles made a name for themselves in the golden age of target shooting. By the late 1800s, the international sport of competitive long-range rifle shooting was widely followed in the United States. The biggest target event was the United States National Match in Creedmoor, New York.

Today, Uberti makes three models of the 1885 High-Wall, chambered in the classic buffalo cartridges—.45-70, .45-90, and .45-120, just like the original High-Wall Winchester rifles. With a High-Wall, Single-Shot Sporting Rifle, Special Sporting or Carbine from Uberti, you can relive a time when rifle shooting was more than a pastime; it was a serious business.

The front sight of the High-Wall Sporting model is dovetailed into the octagonal barrel and can be drifted for windage.

Uberti's accessory sights include a Creedmoor style (A) and a Lyman Style (B). Both are tang mounted rear sights that come complete with tunnel front sights. The Creedmoor sight fits the 1885 High-Wall rifle while the Lyman sight is for the 1873. (1873 rifles will need to be drilled and tapped to accept a rear tang sight).

1885 HIGH-WALL SINGLE-SHOT SPORTING RIFLE - 30"
ITEM #348800 Case-hardened, A-Grade walnut, octagonal barrel

1885 HIGH-WALL SINGLE-SHOT SPECIAL SPORTING RIFLE - 32"
ITEM #348918 Satin walnut, checkered pistol grip, octagonal barrel

1885 HIGH-WALL SINGLE-SHOT CARBINE - 28"
ITEM #348700 Satin walnut, straight stock, round barrel

The .45-70 Government (left) got its name from the .45-caliber bullet with a cartridge case holding 70 grains of black powder adopted by the U.S. Military in the 1870s. The .45-90 (center) held 90 grains of black powder and the buffalo hunter's favorite, the .45-120 (right) held a whopping 120 grains of powder.

The 1885 High-Wall's loading lever (left), opens or locks the rifle's falling-block action (right).

Uberti's 1885 High-Wall single-shot rifles include a breakdown cleaning rod that fits in a compartment located in the buttstock.

SIGHTS

CREEDMOOR REAR TANG SIGHTS AND GLOBE TUNNEL FRONT

The Creedmoor tang sights used on Sharps rifles were of three heights, depending on the yardage. The lowest, short-range sight was good to 300 yards, the mid-range to about 600 yards and long-range to 1,200 yards and beyond.

At very long-range, with the rear sight elevated nearly to its limit, it was important to keep the rifle completely level to maintain accuracy. Consequently, front globe sights were often fitted with a spirit level so that the shooter could see that the bubble was centered and the gun was level before he touched the trigger.
